Subject: CBOT PROPOSAL TO RAISE DAILY TRADING LIMITS

We are full-time farmers and are strongly AGAINST raising the daily trading limits because it makes the farmer that depends on the price stability to make a living less likely to have a steady price. It puts more money in the pocket of the trader that is "in" and "out" of the market rather than the producer who sells once a year as well as the country elevator that works for the pricing for the farmer. If the farmers go "out of business", there will be no commodity to trade!! Thank you for listening, Sincerely, Allan & Marilyn Heyen, Illinois
