Subject: help save price limits

I am writing in regard to the proposed amendments to the CBOT's maximum daily price fluctuation limits. I believe that the launch of the new trading system should be delayed until the computer software can be programmed to handle daily price limits. The alternative will disrupt the grain trade and further reduce the price discovery value of the CBOT. It will also significantly increase the financial exposure of farmers, elevators and processors. Thank you for your consideration. Andrea Sundstrom
