COMMENT

ladies and gentlemen:

i feel it is imperative that open and honest reporting of contract action be continued. are there manipulations in the market regarding silver ? is the government allowing such ? can smaller investors feel free to make commodity transactions under a free, honest regulated system. i hope so, as certainly dishonest, corrupt activities are always found out. That, of course, applies to the governmental and private sector.

i sincerely hope that you take to heart all the comments you receive on these matters, and cause you to take some appropriate action.

sincerely,
karl david keyster in illinois.
