Subject: COT Reports

COMMENT

As a long-time investor in Bullion and in Gold and Silver producers, i would urge you to continue to publish the weekly COT Reports, and indeed to improve it's data rather than try to strangle it.

The lack of Commercial Spreads information is a glaring omission that should be corrected. The outrageous Large Shorts/Large Long traders contract ratio (3.4 X the last i saw) leaves the futures market open to abusive market manipulation, which rampages on as i write.

This Commission has a moral and a legal obligation to act openly and decisively to restore the public's trust in the futures trading market-place. You must act soon or the present abuses are going to lead to serious Senate and Justice investigations. Thank you, BrianB.
