Re: Rule Certification of Amendments to Rules 20102.A and 201A01.D pursuant to CFTC Regulation §40.6(a). CME Submission #06-32.

Dear Ms. Webb:

On March 28, 2006 the Exchange approved the following amendments to Rule 20102.A-Trading Schedule in CME Lumber Futures and Rule 201A01.D-Underlying Futures Contract for CME Lumber Options to be effective for all contract months on March 31 (additions underlined, deletions bracketed):

Random Length Lumber Futures

20102 FUTURES CALL

A. Trading Schedule

Futures contracts shall be scheduled for trading and delivery during such hours and in such months as may be determined by the Board.

Options on Random Length Lumber Futures

201A01 OPTION CHARACTERISTICS

D. Underlying Futures Contract

1. Options in the Regular Cycle

For regular-cycle options, the underlying futures contract is the corresponding futures contract ~~for the month in which the option expires~~. For example, the underlying futures contract ~~for an option that expires in January~~ the January option contract is the January futures contract.

2. Options Not in the Regular Cycle

For options that expire in months other than those in the regular cycle, the underlying futures contract is the next futures contract in the regular cycle that is nearest to the expiration of the option. For example, the underlying futures contract ~~for an option that expires in February~~ the February option contract is the March futures contract.

The Exchange certifies that these amendments comply with the Act and rules thereunder. No substantive opposing views have been expressed to the Exchange.

Please contact Jack Cook at 312-930-3295 or jcook@cme.com if any questions arise. Please reference our CME Submission #06-32 on all correspondence for this.

Sincerely,

A handwritten signature in black ink, appearing to read "John W. Labuszewski". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
