

Jean-Luc Bohbot  
Head of the trade  
Board member  
Sucden Group

Dear members,

My main question concerns the guaranty of the receiver / deliver after an expiry (for example the sugar market) in case of a complete default of the other party to perform or even a bankrupt of the company.

With the size of the open position in most of the markets and the range of volatility today:

Is the respective exchange the final guarantor of the transaction.

Thanks you
