Submitter Address:1401 S. Palmetto Ave., #112

Submitter Address 2:

Submitter City:Daytona Beach

Submitter State:FL

Submitter Zip:32114

Submitter comment: Although this comment is supposed to be directed to wheat futures, it reall should apply to all. The purpose of futures trading was to stabilize market by providing a guaranteed future price. Because of the way things have evolved, futures trading has now become a force for destabilization. It needs to have very strict regulations to control the traders and keep them from artificially running up the market or destroying it.
