**Subject:** Please Impose Position Limits for Metals

---

Dear CFTC

Please take into consideration the continuous manipulation in the metals market, specifically silver manipulation, that puts individual investors at an unfair advantage against the large corporations that have benefited greatly by stealing money from honest hard working people who strive to produce a small nest egg.

This illegal activity can be effectively eliminated by imposing position limits in the open market bringing the manipulation to a halt and allowing silver to find its own price through simple supply and demand. This action on your part shall bring a sense of accomplishment and renew the faith that the American people have in the governing agencies that are in place to protect them from fraud and theft. Please stop the price manipulation of silver.
