**Subject:** Silver

---

Dear Commissioner Chilton, et.al.- In His last days, Jesus was walking to Jerusalem with His disciples when James and John seized an opportunity. "Grant that we may sit, one at Your right hand and one at Your left, in Your glory..." But Jesus said to them "You do not know what you are asking." I feel that way asking you to install the subject position limits. What is it that all of us citizens don't know? Will imposition of limits cause the price of silver to spike? Will limits cause the price to spike too high? Would a price spike cause gold to spike? Would that all lead to a falling dollar? Hyperinflation? A crashed economy? No one wants to have their name associated with the match that caused the Great Chicago Fire, much less the Chicago trigger that crashed the economy. I do not envy the job you all have before you. Nonetheless I hold that it is virtually impossible to justify what I and many others regard as ignoring a crime in progress. I also do not believe there to be a painless way out of this problem. Please institute limits as indicated by Mr. Butler. My prayers are with you. Brad Coyer, OKC,OK
