

Subject: Price limits

This email is in reference to the CME's proposed rule change to daily price limits on Feeder Cattle and Live cattle.

As producer of cattle we are opposed to this change. Supply and Demand has always been the way a free market works. Are you going to put limits on how much a packer can raise his price to the food chains. I don't think so. Putting a limit on this will not be in the best interest of the cattle producer. Please reconsider this.
