Re: Cboe Digital Exchange, LLC Rule Certification
Submission Number CDE-2024-06E

Dear Mr. Kirkpatrick:

Pursuant to Section 5c(c)(1) of the Commodity Exchange Act, as amended (“Act”), and Regulation 40.6(a) of the regulations promulgated by the Commodity Futures Trading Commission (“CFTC” or “Commission”) under the Act, Cboe Digital Exchange, LLC (“CDE” or “Exchange”) hereby submits updates to its Futures Market Maker Incentive Program (“Program”), previously self-certified with the Commission pursuant to Regulation 40.6(a) (CDE-2023-19E). The Program, including marked changes, is set forth in a segregated confidential **Exhibit A** to this submission. The updates to the Program (the “Amendment”) will become effective April 1, 2024.

Program Description

Under the Program, the Exchange makes available a cash incentive pool to be allocated pro-rata based on each eligible Program Participant’s volume, if they meet certain market making performance metrics each month in the Exchange’s margined futures product offerings.¹ The monthly performance metrics include specific two-sided quoting requirements for certain size, spread, and time in the market per contract expiration. The Program is designed to encourage CDE’s Trading Privilege Holders to make tight, liquid markets in futures products recently launched on the Exchange. Participation in the Program will strengthen the quality of price discovery and depth of the order book and increase liquidity in margined futures contracts listed on the Exchange.

Amendment Description

The Amendment makes certain updates to the monthly market making performance metrics under the Program.² Specifically, the Amendment removes the quoting requirement for 100 size in financially-settled margin futures on bitcoin (“FBT”) and on Ether (“FET”), and reduces the 50 size requirement to 25 size. The Exchange has received feedback from its market participants regarding capital costs associated with the Program as well as recent price movements in the underlying markets, and believes that the Amendment to the monthly market making performance

¹ CDE launched financially-settled margin futures on bitcoin (“FBT”) and on Ether (“FET”) on January 11, 2024.

² The monthly market making performance metrics are provided in Appendix A to the Program.

metrics will allow Market Makers under the Program to use their capital more effectively for quoting FET and FBT futures contracts.

The Amendment does not make any changes to the Program Participant eligibility criteria, the Program Incentives offered under the Program, or the general purpose or function of the Program.

Core Principle Compliance

CDE believes that the Programs are consistent with the Designated Contract Market (“DCM”) Core Principles under Section 5 of the Act. In particular, CDE believes that the Program is consistent with:

- DCM Core Principle 2 (Compliance with Rules) for the following reasons:
 - All Trading Privilege Holders, including all eligible Program Participants, are obligated by CDE Rule 314 (Application of Rules and Consent to Exchange Jurisdiction) to comply with Exchange Rules. Exchange Rules include prohibitions against fraudulent, non-competitive, unfair, and abusive trading practices, and the Exchange monitors trading in all futures contracts for violative activity such as wash trading, manipulative trading, and market abuse; and
 - The Program is open to all Trading Privilege Holders to apply to participate as a Program Participant and offers the same pro-rata cash pool incentive structure for meeting the same monthly market making performance metrics, including as amended, for all eligible Trading Privilege Holders.
- DCM Core Principle 4 (Prevention of Market Disruption) because CDE Rules prohibit participants, including all eligible Program Participants, from manipulating the market in, disrupting the orderly functioning of the market in, or creating a condition in which prices do not or will not reflect fair market values in CDE futures contracts, and CDE enforces compliance with such CDE Rules;
- DCM Core Principle 9 (Execution of Transactions) because the Program does not impact order execution priority or otherwise give any Program Participant an execution advantage. All CDE futures contracts are listed for trading in the open and competitive market, and the incentives under the Program will not adversely impact price discovery in the centralized market;
- DCM Core Principle 12 (Protection of Markets and Market Participants) because the CDE Rules include prohibitions against abusive practices, including abusive practices committed by a party acting as an agent for a participant, and promote fair and equitable trading, all of which apply in relation to all activity in participation in the Program.
- Core Principle 16 (Conflicts of Interest) because CDE has policies and procedures in place that are designed to minimize conflicts of interest and establish a process for resolving conflicts of interest, and CDE enforces such policies and procedures. Specifically, the policies and procedures ensure that all CDE Trading Privilege Holders, including all Program Participants, are treated in the same manner; are subject to the same access requirements and fees, and receive or have access to the same information. CDE may not and does not share confidential information with any Program Participant about planned

initiatives that would provide a Program Participant with an advantage or inside information in relation to other TPHs or market participants, and as such, Program Participants are not involved in any part of the implementation of or selection process for the Program.

The Program will continue to provide meaningful incentives and market making metrics to eligible Program Participants to engage on CDE's futures markets and will continue to facilitate and accelerate the growth of such markets. The Exchange believes that the Program enhances the price discovery process by promoting increased trading volume and liquidity in futures products traded on CDE's centralized market, thereby encouraging participation and growing quality markets on the Exchange. Accordingly, CDE believes that the impact of the Program is beneficial to the public and market participants.

Public Information

We have concurrently posted a notice and copy of this submission on the Exchange's website at <https://www.cboedigital.com/regulation/exchange-notices/> under "CFTC Submissions."

Opposing Views

We are not aware of any opposing views to this self-certification.

Certification

Cboe Digital Exchange, LLC hereby certifies to the Commodity Futures Trading Commission, pursuant to the procedures set forth in Commission regulation §40.6, that this submission complies with the Commodity Exchange Act, as amended, and the regulations promulgated thereunder.
