

Exchange Execution Fees

ISO: ERCOT, PJM, MISO, CAISO, ISO-NE, SPP, and NYISO
Products: Bounded Futures & Binary Options

Fee Tier	Qualification	Execution Fee
1	0 - 249 lifetime ¹ contracts traded	\$0.25
2	250 - 999 lifetime contracts traded	\$0.20
3	1000+ lifetime contracts traded OR ≥ \$25k lifetime cumulative deposits	\$0.15

To properly determine which Fee Tier a Participant qualifies for as it relates to lifetime contracts traded, the Exchange will total a Participant's lifetime contracts traded at the end of the trading day and any Execution Fee based on qualification for a Fee Tier will be effective as of the following trading day. Once a Fee Tier has been achieved by a Participant, they will receive the effective Execution Fee tied to that Fee Tier **unless and until** they qualify for the next Fee Tier. For the sake of clarity, a Participant Execution Fee will not be increased once a Fee Tier has been reached, this is an intended benefit for the Participant as Execution Fees only become lower at each achieved Fee Tier level.

Disclaimer:

All fees of EXI are subject to the EXI Rulebook and EXI Legal Notices and Disclosure as found at www.electronx.com/regulatory.

¹ "Lifetime" means the cumulative total accrued since the Participant's account was established, and does not reset across Fee Tiers.
