Section 2 – Index Administration and Governance

The S&P 500 index is administered, calculated, and published by S&P Dow Jones Indices LLC (“S&P DJI”), a part of S&P Global Inc. Created in 1957, it was the first US market-capitalization-weighted stock price index. Index constituents include approximately 500 leading US companies and capture approximately 80% coverage of US market capitalization.

The index is reconstituted annually and rebalanced after close of trading in US equity markets on the third Friday of every March Quarterly month. Each index constituent firm must meet the following criteria at the time of such rebalancing.¹

| | |
|-----------------------|--|
| Listing Universe | US company |
| Market Capitalization | At least \$13.1 bln |
| Tradable Supply | At least 10% of shares outstanding must be available for trading. |
| Financial Viability | Positive as-reported earnings, both for the most recent quarter and for the most recent four quarters in aggregate |
| Liquidity and Price | Highly tradable common stock, with active and deep markets. |

As of November 2, 2022, the index comprises 503 constituent firms, with aggregate market capitalization of \$34.68 trillion.² The following statistics describe the distribution of index constituents in terms of their individual market capitalizations (in \$ mln):³

| | |
|----------|-----------|
| Largest | 2,307,154 |
| Average | 68,948 |
| Median | 28,305 |
| Smallest | 4,381 |

The largest single constituent signifies 6.9% of index weight. The largest 10 constituents represent 25.8% of index weight.

The Nasdaq-100 Index, administered, calculated, and published by Nasdaq, is based on equity share prices of approximately 100 domestic and international non-financial companies with largest market capitalization that are listed on the Nasdaq Stock Market. The Index reflects companies across major industry groups, including computer hardware and software, telecommunications, retail/wholesale trade and biotechnology. It does not contain securities of financial companies or investment companies.

The index is reconstituted annually and rebalanced after close of trading in US equity markets on a quarterly basis on the third Friday in March, June, September, and December. Each index constituent firm must meet the following criteria at the time of such rebalancing⁴

| | |
|--------------------|--|
| Listing Universe | US company |
| Liquidity | At least 200,000 shares in ADV |
| Industry or Sector | Must be classified as a Non-Financial company |
| Seasoning | Must have traded for at least three full calendar months |

As of November 2, 2022, the index comprises 102 constituent firms, with aggregate market capitalization of \$14.38 trillion.⁵ The following statistics describe the distribution of index constituents in terms of their individual market capitalizations (in \$ mln):⁶

| | |
|----------|-----------|
| Largest | 2,307,154 |
| Average | 140,963 |
| Median | 47,508 |
| Smallest | 8,089 |

The largest single constituent signifies 14.% of index weight. The largest 10 constituents represent 49.3% of index weight.

Section 3 – Index Evaluation

The Commodity Exchange Act (“CEA” or the “Act”) requires that security futures products, defined to comprise single stock futures and futures on narrow-based security indexes, shall be subject to the joint jurisdiction of the CFTC and the Securities Exchange Commission (“SEC”). Futures products for which the underlying references are broad-based security indexes remain under the sole jurisdiction of the CFTC.

Section 1a(35) of the Act defines a narrow-based index to be an index

- (i) which has nine (9) or fewer component securities; or
- (ii) in which any component security comprises more than 30 percent of the index’s weighting; or
- (iii) in which the 5 highest weighted component securities in the aggregate represent more than 60 percent of the index’s weighting; or
- (iv) in which the lowest weighted component securities comprising, in the aggregate, 25 percent of the index’s weighting have an aggregate dollar value of average daily trading volume of less than \$50,000,000 (or in the case of an index with 15 or more component securities, less than \$30,000,000).

Both the S&P 500 Index and the Nasdaq-100 Index fail to meet any of the criteria for consideration as a narrow-based index. *The Exchange has determined, therefore, that Options on Micro E-mini S&P 500 Index Futures and Options on Micro E-mini Nasdaq-100 Index Futures shall be listed for trading under the sole jurisdiction of the CFTC.*

For the S&P 500 Index, in respect of criterion (i), as of November 2, 2022, the number of Index components was 503. The number of Index constituents exceeds the 9-security minimum threshold.

In respect of criteria (ii), (iii), and (iv), Exhibit 1 displays summary statistics of daily data for the interval May 2, 2022 through November 15, 2022.

For criterion (ii), the share of Index weight occupied by the largest component stock, test results appear in the left-hand panel of Exhibit 1. The entire distribution of daily outcomes resides well below the 30 percent threshold that would signify a narrow-based index. At no point does the Index’s largest component stock even account for more than 8 percent of Index weight.

Similar results obtain for criterion (iii), shown in the middle panel of Exhibit 1. The distribution of aggregate weight of the Index’s largest five component stocks also lies below the 60 percent threshold that would characterize a narrow-based index. In no instance do the largest five members of the Index account for more than 22 percent of Index weight.

Summary statistics for distributions of trading volume, shown in Exhibit 1’s right-hand panel, demonstrate that the Index is not narrow-based in the sense of criterion (iv). The test procedure is to rank the Index’s component stocks from smallest market capitalization to largest, then to identify Index components with smallest market capitalizations in sufficient number to account for 25 percent of Index weight. If the representative aggregate daily trading volume of such identified Index components were less than \$30 million, then the Index would be considered narrow-based.

For the S&P 500 Index, the typical pace of such trading volume consistently exceeds \$60 billion per day.

For the Nasdaq-100 Index, in respect of criterion (i), as of November 2, 2022, the number of Index components was 102. The number of Index constituents exceeds the 9-security minimum threshold.

In respect of criteria (ii), (iii), and (iv), Exhibit 2 displays summary statistics of daily data for the interval May 2, 2022 through November 15, 2022.

For criterion (ii), the share of Index weight occupied by the largest component stock, test results appear in the left-hand panel of Exhibit 2. The entire distribution of daily outcomes resides well below the 30 percent threshold that would signify a narrow-based index. At no point does the Index’s largest component stock even account for more than 15 percent of Index weight.

Similar results obtain for criterion (iii), shown in the middle panel of Exhibit 2. The distribution of aggregate weight of the Index’s largest five component stocks also lies below the 60 percent threshold that would characterize a narrow-based index. In no instance do the largest five members of the Index account for more than 40 percent of Index weight.

Summary statistics for distributions of trading volume, shown in Exhibit 2’s right-hand panel, demonstrate that the Index is not narrow-based in the sense of criterion (iv). The test procedure is to rank the Index’s component stocks from smallest market capitalization to largest, then to identify Index components with smallest market capitalizations in sufficient number to account for 25 percent of Index weight. If the representative aggregate daily trading volume of such identified Index components were less than \$30 million, then the Index would be considered narrow-based.

Section 4 – Compliance with Core Principles

The Exchange has reviewed the designated contracts market core principles (“Core Principles”) as set forth in the Act and has identified that the Contracts may bear upon the following Core Principles:

Core Principle 2 – Compliance with Rules

The Contracts shall be subject to CME Rulebook Chapter 4, which includes prohibitions against fraudulent, noncompetitive, unfair, and abusive practices. Additionally, trading in this Contracts shall be subject to the Exchange’s trade practice rules, the majority of which are contained in Chapter 5 and Chapter 8 of the CME Rulebook. Trading activity in this Contracts shall be subject to monitoring and surveillance by CME Group’s Market Regulation Department, which has the authority to exercise its investigatory and enforcement power where potential rule violations are identified.

Core Principle 3 – Contracts Not Readily Subject to Manipulation

The Contracts are not readily subject to manipulation due to the deep liquidity and robustness in the underlying cash and futures market, which provides diverse participation and sufficient spot transactions.

The underlying reference Indexes are judged to be sufficiently broad in definition and scope to deter attempted cornering, manipulation, crowding, or exertion of undue influence upon final settlements of expiring Contracts.

As of November 2, 2022, the S&P 500 Index had a market capitalization of \$34.68 trillion and the Nasdaq-100 Index had a market capitalization of \$14.38 trillion.⁷

Core Principle 4 – Prevention of Market Disruption

The Contracts shall be subject to CME Rulebook Chapter 4, which includes prohibitions on manipulation, price distortion, and disruption to the expiration and assignment process. The Contracts shall be subject to monitoring and surveillance by CME Group’s Market Regulation Department.

As with any new product that is listed on a CME Group designated contract market and that references a broad-based index of US equity share prices, moreover, trading in the Contracts shall be subject to price limits that are harmonized with the US equity market-wide limit-up-limit-down mechanism set forth in the “Plan to Address Extraordinary Market Volatility Submitted to the Securities and Exchange Commission Pursuant to Rule 608 of Regulation NMS under the Securities Exchange Act of 1934”⁸ and implemented under, e.g., New York Stock Exchange Rule 7.12 for Trading Halts Due to Extraordinary Volatility or under Nasdaq Stock Market Rule 4121 for Trading Halts Due to Extraordinary Volatility.

S&P indices are covered under Section 9, S&P Obligations, paragraph (a) in the License Agreement dated June 29, 2012 made by and between Standard & Poor’s Financial Services LLC and CME.

S&P OBLIGATIONS. (a) Regulatory Approvals or Investigations. S&P shall reasonably assist CME in connection with the preparation of factual materials for presentation to the CFTC, or any other governmental entity, in connection with any application by CME for approval to trade any of the

Indexed Contracts licensed hereunder, or any investigations or hearings regarding any such Indexed Contracts.

Nasdaq indices are covered by Section 11 – Regulatory Cooperation of the Amended and Restated Agreement for Nasdaq Index-Based Contracts entered into by Nasdaq, Inc. and Chicago Mercantile Exchange, Inc on September 12, 2018. For your guide on the below, Section 16 is the confidentiality clause, which does not influence the meaning of Section 11.

Section 11. Regulatory Cooperation. Nasdaq agrees to provide reasonable information, which information shall be deemed Confidential Information of Nasdaq whether or not marked as such, to CME's Market Regulation Department as necessary to enable CME and its Affiliates to satisfy their regulatory obligations and reasonably consider implementation of any actions reasonably proposed by CME which are designed to ensure compliance with such regulatory obligations. In addition, Nasdaq agrees to provide CME, upon reasonable request from time to time, with the information underlying the Indexes which is necessary for CME to comply with CME's regulatory obligations. Notwithstanding anything else in this Agreement, if and to the extent that CME reasonably determines that any information or data underlying the Indexes must be submitted by or for CME to a governmental or regulatory agency, or any joint supervisory or regulatory oversight group of which CME or its Affiliate is a signatory or member (or a member or signatory thereof), CME shall have the right to so share the information or data underlying the Indexes subject to the requirements detailed in Section 16.

Core Principle 5 – Position Limits or Accountability

The Options on Micro E-mini S&P 500 futures contracts shall be subject to a Position Reporting Level of 100 contracts and to an All-Month Position Limit of 300,000 contracts. Accordingly, as of market close on November 2, 2022, a hypothetical 300,000-lot Contract position would have signified notional Index exposure around \$56.4 bln (equal to (3,759.69 Index points) x (\$5 per Index point per contract) x (300,000 contracts) x (10/1)), representing less than 0.17% of Index market capitalization (\$34.68 trln).

The Options on Micro E-mini Nasdaq-100 futures contracts shall be subject to a Position Reporting Level of 25 contracts and to an All-Month Position Limit of 250,000 contracts. Accordingly, as of market close on November 2, 2022, a hypothetical 250,000-lot Contract position would have signified notional Index exposure around \$62.2 bln (equal to (12,439.68 Index points) x (\$2 per Index point per contract) x (250,000 contracts) x (10/1)), representing less than 0.43% of Index market capitalization (\$14.38 trln).

Core Principle 7 – Availability of General Information

The Exchange shall disseminate a Special Executive Report (“SER”) that sets forth information with regard to specifications, terms, and conditions of the Contracts. In addition to such SER, daily trading volume, open interest, and price information for the Contracts shall be published on the CME Group website.

Core Principle 8 – Daily Publication of Trading Information

The Exchange shall publish trading volumes, open interest levels, and price information daily of the Contracts on the CME Group website and through quote vendors.

Core Principle 9 – Execution of Transactions

The Contracts will be listed for trading on the CME Globex electronic trading platform and for submission of clearing via CME ClearPort. CME Globex provides for competitive and open execution of transactions and affords the benefits of reliability and global connectivity.

Core Principle 10 – Trade Information

All requisite trade information shall be included in the audit trail and will suffice for the Market Regulation Department to monitor for market abuse.

Core Principle 11 – Financial Integrity of Transactions

The Contracts shall be cleared by CME Clearing, which is registered with the Commission as a derivative clearing organization, and which is subject to all CFTC regulations related thereto.

Core Principle 12 – Protection of Markets and Market Participants

Chapters 4 and 5 in the CME Rulebook set forth multiple strictures that preclude intermediaries from disadvantaging their customers. These Rules apply to trading in the Exchange’s competitive trading venues and will apply to transactions in the Contracts.

Core Principle 13 – Disciplinary Procedures

Chapter 4 of the CME Rulebook provide for the Exchange to discipline, suspend, or expel members or market participants who violate the rules of the Exchange. Trading in the Contracts shall be subject to these provisions. The Exchange’s Market Regulation Department has the authority to exercise its powers of enforcement, in the event that rule violations in the Contract are identified.

Core Principle 14 – Dispute Resolution

Disputes in respect of the Contracts shall be subject to the arbitration provisions set forth in Chapter 6 of both the CME Rulebook, which allow all nonmembers to submit to arbitration claims for financial loss resulting from transactions on the Exchange. Pursuant to these provisions, any member named as a respondent in any such claim submitted by a nonmember is required to participate in arbitration proceedings. Additionally, the Exchange requires members to resolve via arbitration all disputes concerning transactions on the Exchange.

The Exchange hereby certifies that the Contracts comply with the Act, including regulations under the Act. There were no substantive opposing views to this proposal.

The Exchange certifies that this submission has been concurrently posted on the CME Group website at <http://www.cmegroup.com/market-regulation/rule-filings.html>.

361A02. EXERCISE AND ASSIGNMENT

In addition to the applicable procedures and requirements of Chapter 7, the following shall apply to the exercise of options.

361A02.A. Exercise

2. Quarterly Options

Any Quarterly option (Rule 361A01.D.1.) may be exercised by the buyer on any Business Day on which such option may be traded. To exercise such option, the clearing member representing the option buyer shall present an exercise notice to the Clearing House by 5:30 p.m., or by such other time as the Exchange may designate, on the day of exercise.

Any unexercised option shall expire at 5:30 p.m. on the last day of trading in such option (Rule 361A01.I.). Any option that is in the money, and that has not been liquidated or exercised prior to its termination of trading, shall be exercised automatically upon expiration, in the absence of contrary instructions. Such contrary instructions must be delivered to the Clearing House, by the clearing member representing the buyer of such option, no later than 5:30 p.m., or such other time as may be designated by the Exchange, on the last day of trading in such option.

An expiring call option shall be in the money if the Final Settlement Price of such option's Underlying Futures Contract (Rule 361A01.D.) on such option's Expiration Date is strictly above such option's exercise price and shall be out of the money if such settlement price is at or below such option's exercise price.

An expiring put option shall be in the money if the Final Settlement Price of such option's Underlying Futures Contract on such option's Expiration Date is strictly below such option's exercise price and shall be out of the money if such Final Settlement Price is at or above such option's exercise price.

2. European Style Weekly Options, European Style Monday Weekly Options, European Style Tuesday Weekly Options, European Style Wednesday Weekly Options, European Style Thursday Weekly Options, and European Style End of Month Options

Any European style Weekly option (Rule 361A01.D.2.), European style Monday Weekly option (Rule 361A01.D.3.), European style Tuesday Weekly option (Rule 361A01.D.4.), European style Wednesday Weekly option (Rule 361A01.D.5.), European style Thursday Weekly option (Rule 361A01.D.6.), or European style End of Month option (Rule 361A01.D.7.) may be exercised only at, and not before, expiration of such option.

Following termination of trading in expiring options, any such option that is in the money shall be automatically exercised by the Clearing House, and any such option that is out of the money shall be abandoned by the Clearing House. For the avoidance of doubt, no such option that expires in the money may be abandoned, and no such option that expires out of the money may be exercised.

Whether an option expires in the money or out of the money shall be determined by the Exchange, in its sole discretion, by reference to the Fixing Price of such option's Underlying Futures Contract (Rule 361A01.D.). The Exchange, in its sole discretion, shall set such Fixing Price on the last day of trading in such option equal to the Fixing Price of the E-mini Nasdaq-100 Index futures pursuant to Rule 359A02.A as rounded to the nearest integer multiple of 0.01 Index points.

An expiring call option shall be in the money if the corresponding Fixing Price is at or above such option's exercise price and shall be out of the money if the corresponding Fixing Price is strictly below such option's exercise price.

An expiring put option shall be in the money if the corresponding Fixing Price is strictly below such option's exercise price and shall be out of the money if the corresponding Fixing Price is at or above such option's exercise price.

361A02.B. Assignment

For a given option contract, an exercise notice accepted by the Clearing House in accordance with Rule 361A02.A. shall be assigned by the Clearing House through a process of random selection to clearing members carrying open short positions in such option contract. A clearing member to whom such exercise notice has been assigned shall be notified thereof as soon as practicable following such assignment.

The clearing member to whom such exercise notice has been assigned shall be assigned a short position in such option's Underlying Futures Contract (Rule 361A01.D.) if such option is a call, or a long position in such option's Underlying Futures Contract if such option is a put. The clearing member representing the option buyer making exercise shall be assigned a long position in such option's Underlying Futures Contract if such option is a call, or a short position in such option's Underlying Futures Contract if such option is a put.

All such futures positions shall be assigned at a price equal to the exercise price of such option contract and shall be marked to market (in accordance with Rule 814) on the Business Day on which the Clearing House accepts such exercise notice.
