Chapter 18A
Standard Options on U.S. Treasury Bond Futures

18A01.E. Exercise Prices

1. One (1) Point Exercise Prices

Option exercise prices shall be in terms of U.S. Treasury Bond futures price points (Rule 18102.C.) and shall be in integer multiples of one (1) point (Rule 18A01.C.).

At the commencement of trading in option contracts for a given expiration date, the Exchange shall list put and call options at the exercise price that is nearest the previous day's settlement price of the respective Underlying Futures Contract ("at-the-money price" or "ATM price"). If the previous day's Underlying Futures Contract settlement price is midway between two eligible option exercise price levels, then the ATM price shall be set as the higher of the two eligible exercise price levels. The Exchange also shall list for trading put and call options at all eligible exercise price levels in a range of 30 points above and 30 points below (i.e., 30 exercise price levels above and 30 exercise price levels below) the ATM exercise price.

Thereafter, the Exchange shall add new put and call options to ensure that such options are listed for trading at all eligible exercise prices in a range of at least 30 points above and at least 30 points below (i.e., 30 exercise price levels above and 30 exercise price levels below) the ATM exercise price level that is set with reference to the most recent Underlying Futures Contract settlement price. New options may be listed for trading up to and including the termination of trading in such options.

Upon demand and at the discretion of the Exchange, a new option contract with an out-of-current-range exercise price may be added, on an as-soon-as-possible basis, *provided that* the exercise price of such newly added option contract must be an integer multiple of one (1) price point (Rule 18A01.C.).

The Exchange may modify the procedure for the introduction of exercise prices as it deems appropriate.

2. Special Listings of One Half (1/2) of One Point Exercise Prices

At any given time, the Exchange shall ensure that options are listed for trading at exercise prices that are in terms of U.S. Treasury Bond futures price points (Rule 18102.C.) and shall be in integer multiples of one half (1/2) of one (1) point for (i) all Weekly Options and (ii) the nearest expiring Serial or Quarterly Options (Rule 18A01.C.). For any Weekly, Serial or Quarterly Options with exercise price levels in integer multiples of one half (1/2) of one (1) point, the Exchange shall add new put and call options in integer multiples of one half (1/2) of one (1) price point in a range of at least 30 points above and at least 30 points below (i.e. 30 additional exercise price levels above and 30 additional exercise prices below) the ATM exercise price level that is set with reference to the most recent Underlying Futures Contract settlement price.
