Re: Class Certification of Interest Rate Swaps Under 17 CFR 40.2(d)

Dear Secretary Kirkpatrick:

On August 24, 2023, RTX Fintech & Research LLC ("RTX SEF") submitted its class certification of interest rate products ("IRS Products") that it intended to list, in accordance with 17 CFR 40.2(d), on August 28, 2023. The IRS Products only included cleared products at LCH Ltd. or CME Inc. for USD, EUR, GBP, and JPY fixed/floating IRS or basis swaps. At the request of CFTC Staff, RTX SEF has withdrawn the submission to break out the single filing into separate submissions, which include:

- Fixed-for-Floating IRS—USD SOFR
- Fixed-for-Floating IRS—EUR EURIBOR
- Fixed-for-Floating IRS—EUR EuroSTR
- Fixed-for-Floating IRS—GBP SONIA
- Fixed-for-Floating IRS—JPY TONA
- Basis Swap—USD SOFR vs. Fed Funds
- Basis Swap—EUR EURIBOR vs. EuroSTR

This submission covers the following product: Basis Swap—EUR EURIBOR vs. EuroSTR (the "Product").

RTX SEF hereby notifies the Commodity Futures Trading Commission ("CFTC") that it intends to list the product identified above in accordance with 17 CFR 40.2(d). RTX SEF intends to list the Product on **Tuesday**, **August 29**, **2023**.

In accordance with 17 CFR 40.2, this submission includes the following:

- the certifications required under 17 CFR 40.2(d);
- a copy of the submission cover sheet required under 17 CFR 40.2(a)(3)(i); and
- the certifications required under 17 CFR 40.2(a)(iv) and 17 CFR 40.2(a)(vi).

In addition, in accordance with 17 CFR 40.2(a)(1), RTX SEF is filing this submission electronically in the format and manner specified by the Secretary of the Commission with the Secretary of the Commission. As required under 17 CFR 40.2(a)(2), the CFTC has received the submission (in its original form) by the open of business on the business day preceding the Product's listing on August 29, 2023.

The attachments to this letter, which include additional items than those referenced above, are listed below.

Attachment	Description
Attachment A	Certifications
Attachment B	Terms and Conditions of Product

Please direct questions about this submission to Glenn Chaleff, RTX SEF's CCO, at (917) 694-4856 or glenn@rtxfintech.com.

Sincerely,

Glenn Chaleff,

Glem Chaleff

Chief Compliance Officer, RTX SEF

Attachment A

Certifications Required Under 17 CFR 40.2(d), 17 CFR 40.2(a)(iv), and 17 CFR 40.2(a)(vi)

RTX Fintech & Research LLC ("RTX SEF") hereby certifies the following:

17 CFR 40.2(d)

- that each particular swap within the certified class of swaps is based upon an excluded commodity specified in 17 CFR 40.2(d)(1);
- that each particular swap within the certified class of swaps is based upon an excluded commodity with an identical pricing source, formula, procedure, and methodology for calculating reference prices and payment obligations;
- that the pricing source, formula, procedure, and methodology for calculating reference prices and payment obligations in each particular swap within the certified class of swaps is identical to a pricing source, formula, procedure, and methodology for calculating reference prices and payment obligations in a product previously submitted to the CFTC and certified or approved pursuant to 17 CFR 40.2 or 17 CFR 40.3;
- that each particular swap within the certified class of swaps is based upon an excluded commodity involving an identical currency or identical currencies;

17 CFR 40.2(a)(iv)

• that the products to be listed comply with the Commodity Exchange Act and CFTC regulations thereunder; and

17 CFR 40.2(a)(vi)

• that, concurrent with this submission, RTX SEF posted on its website (1) a notice of pending certification of the products with the CFTC and (2) a copy of this submission.

Product Terms and Conditions

7 Basis Swap-EUR EURIBOR vs. EuroSTR

7.1 Discussion: Contracts Not Readily Susceptible to Manipulation

The interest rate swap (IRS) market is considered the largest derivative market in the world, with an estimated 632 trillion in notional principal outstanding as of June 2022 according to the Bank for International Settlements.²⁵

IRS are cash-settled, so there is no deliverable supply to be manipulated. IRS are widely used by corporations, insurance companies, banks, and governments to transfer and manage interest rate risk. Interest-rate-linked financial instruments (e.g., bonds, loans, government interest-bearing instruments, and interest-rate-sensitive instruments) are not easily susceptible to manipulation because of the size and liquidity of the cash market for such instruments. Furthermore, IRS-associated interest rate futures contracts, loans, cleared swaps, and cash and futures markets for government debt securities offer a deep liquidity pool to hedge and risk-manage swaps based on such rates indexes.

RTX SEF will monitor trading in these swaps. RTX SEF has a comprehensive surveillance program and rules to prevent RTX SEF Participants from engaging in manipulative activity and possesses discretion to impose fines and disciplinary sanctions on its Participants.

7.1.1 Discussion of Index Reference Prices: EURIBOR & EuroSTR

RTX SEF limits the indexes underlying its interest rate swap offerings to well-established, publicly available third-party interest rate market benchmarks. Some are published by central banks (such as the United States Federal Reserve Secured Overnight Financing Rate (SOFR) rate), while others are calculated and published by reliable independent providers (such as trade associations, exchanges, or other third parties). The interest rate reference prices underlying swaps on RTX SEF are the timeliest, most widely recognized, and reliable benchmarks for interest rates in their respective markets. The index levels are readily available and commercially acceptable as benchmarks for borrowers, lenders, investors, portfolio managers, governments, and public policy makers.

The EuroSTR euro short-term rate is administered and published by the European Central Bank (ECB). The ECB has designed EuroSTR to be an overnight rate consistent with international best practice set out in the International Organization of Securities Commissions (IOSCO) Principles for Financial benchmarks. The euro short-term rate was first published on October 2, 2019. The euro short-term rate (EuroSTR) reflects the wholesale euro unsecured overnight borrowing costs of banks located in the euro area. The EuroSTR is published on each defined business day based on transactions conducted and settled on the previous defined

²⁵https://www.bis.org/publ/otc_hy2211.pdf

business day (the reporting date "T") with a maturity date of T+1, which are deemed to have been executed at arm's length and thus reflect market rates in an unbiased way.

The Euro Interbank Offered Rate (EURIBOR) provides an indication of the average rate at which Eurozone banks offer to lend unsecured funding to other banks in the Euro wholesale money market for a given period of time. The European Money Market Institute (EMMI) has been granted authorization by the Belgian Financial Services and Markets Authority (FSMA) for the provision and administration of EURIBOR in compliance with the EU Benchmark Regulation. A representative sample of panel banks that are active participants in the Euro money markets provide daily quotes for five defined tenors (one week, one month, three months, six months, and twelve months) at which interbank term deposits, denominated in Euro, are being offered within the euro zone between prime banks. The EMMI EURIBOR Steering Committee defines and reviews the size and composition of the panel and monitors ongoing compliance with and adequacy of both the panel criteria and the EURIBOR Governance Framework, including the EURIBOR Benchmark Determination Methodology. Panel banks submit their contribution data each day, rounded to two decimal places. The highest and lowest 15% of the final contribution rates of all panel banks are eliminated for each tenor. The remaining rates are then arithmetically averaged and rounded to three decimal places. The published EURIBOR rates follow euro money market convention for spot settlement (T+2) and an actual/360 day-count convention.

The EURIBOR rate has been published since December 30, 1998. The EURIBOR is widely accepted as a reliable interbank rate for the Euro money market and is widely distributed by Thomson Reuters. Additional information regarding the selection of panel banks, the calculation of EURIBOR rates, systemic safeguards in place to ensure the reliability of the published rates, and the governance framework may be accessed on EMMI's website.²⁶

RTX SEF believes that the large number of participants in each market and the calculation of each index by well-known, independent third parties further limits the susceptibility of manipulation of these indexes. RTX SEF believes that such benchmark indexes (many of which also underlie liquid interest rate futures contracts on major Designated Contract Markets) are not readily susceptible to manipulation due to the large number of index participants, ubiquity, and broad-market nature.

7.2 MAT Contracts: Swaps Subject to the Trade Execution Requirement

For interest rate swaps that are Made Available Trade (MAT)—that is, subject to the Trade Execution Requirement under CEA section 2(h)(8)—see the industry filings posted on the CFTC's website.²⁷

7.3 Product Description

Participants can trade the product below as of August 29, 2023.

Product	Currency	Index	Authorized DCO
Basis Swap, Floating/Floating	EUR	EURIBOR, EuroSTR	LCH Ltd./CME Inc.

An IRS is where two parties agree to exchange interest rate cash flows, based on a specified notional amount from a fixed rate to a floating rate (or vice versa) or from one floating rate to another for a predetermined term. In a Basis Swap IRS, one party pays a floating rate for the term of the IRS indexed to a floating reference rate. The other party will also pay a floating rate indexed to a reference rate in a different tenor.

7.4 Clearing Required

The listed specifications for this product represent the customary attributes of the swap agreements. Because RTX SEF only permits trading in cleared products, all attributes must conform to the specifications of the authorized DCOs.

7.5 General Definitions

Unless stated otherwise in the product specifications or terms and conditions, below are the general definitions for products listed on RTX SEF.

Ітем	Description
Swap Transaction	Any transaction that is a rate swap, basis swap, or similar transaction (and any combination thereof).
Fixed-Rate Payer	A party obligated to make payments calculated by reference to a fixed rate.
Floating-Rate Payer	A party obligated to make payments calculated by reference to a floating rate.
Floating-Rate Index	Depends on currency and as agreed by Participants.
Quoting Convention/Min. Increment	Depends on Currency, Index, and Tenor for Electronic Order Book or as agreed by Participants for Voice Order Book.
Min. Size	Depends on Currency, Index, and Tenor for Electronic Order Book or as agreed by Participants for Voice Order Book.
Confirmation	Documents or other confirming evidence exchanged between the counterparties that confirm all the terms of the Swap Transaction.
Business Day	A day on which banks settle payments.
Day-Count Convention	The convention used for adjusting any relevant date that would otherwise fall on a non-Business Day. Day count will be specific to the individual product specification.
Holiday Calendar	Applied in accordance with the country currency denoted for the instrument.
Term (Tenor)	The total period of the Swap Transaction, starting on the Effective Date and ending on the Termination Date.
Notional Types	Bullet = notional remains constant over term of swap; amortizing = notional declines over term of swap; accreting = notional increases over term of swap.
Effective (Start) Date	The first date of the Term of the Swap Transaction, Spot or Forward starting, subject to the agreed Day-Count Convention.
Termination Date	The last day of the Term of the Swap Transaction.
Maturity Date	Start Date + Term (Tenor).
First Fixing Date	The first Index Fixing Date is zero, one, or two business days (depends on that Currency's market standard and according to agreed Holiday calendars) prior to the Start Date of the Swap.

Ітем	Description
Trade Types	The following swap types may be executed: Outright (Spot and Forward starting),
	Curve (tenor) Spreads, Butterflies, Spreads between different floating Indices, Spreads to Futures, Spreads to Treasuries, and combinations thereof.
Trade Start Types	Spot = a swap where the Effective Date is T+o (e.g., GBP), T+2 (e.g., USD, EUR,
	JPY) from the trade date, depending on Currency and floating Index market standard; forward = a swap where the Effective Date is after the Effective Date for a Spot Starting
	swap of that Currency and floating Index.
Settlement Procedure	As determined by the Clearing Organization.
Block Trades	Block Trades may be submitted pursuant to RTX SEF Rule 510.
Position Limits	Parts 150 and 151 of the Commission's regulations, as applicable, set forth the Commission's rules regarding speculative position limits. The CFTC does not require speculative position limits for IRS.
Trading Hours	The operating hours of RTX SEF, published on RTX SEF's website.

Table: General Definitions Cont'd

7.6 Product Specifications & Terms and Conditions

Ітем	Description
Contract Definition	An agreement to exchange two streams of floating cash flows on a specified notional over a term to maturity.
Basis Spread	A spread between two Floating Rate Indices (EURIBOR & EuroSTR) of the same currency (EUR).
Basis Spread Types	3v1, 3v6 or 6v3, 3v12, 6v12 or other combinations of floating indices as agreed by Participants.
Specific Trade Types	The following swap types may be executed: Outrights (Spot and Forward starting), Curve (tenor) Spreads, Butterflies.
Trade Start Dates	Spot or Forward Start Date or as agreed by the Participants, subject to DCO rules.
Swap Term (Tenor)	As agreed by the Participants. A contract can have a Tenor from 3 months to 51 years.
Trading Conventions	Buy/pay = Pay Floating EURIBOR Index Flat, Receive Floating EuroSTR Index + Basis; spread sell/receive = Receive Floating Index EURIBOR Flat, Pay Floating EuroSTR Index + Basis Spread; basis spread price Quoted in increments of fractions or decimals of a basis point. Leg I is usually the longer underlying index tenor (e.g., 3vI rather than Iv3). Thus the 3M index is paid flat and the spread is added to the Im index. The shorter index can be compounded, i.e. Q/Q = 3m index vs I quarterly payment consisting of 3 compounded Im index settings OR the shorter index can be 3 separate monthly payments.
SWAP CONVENTIONS	7.1.7
Floating Legs 1 & 2	
Index	As agreed by Participants and suitable to the Currency's market standards (EURIBOR & EuroSTR).
Payment/Resets	Annual, Semi-Annual, Quarterly, Monthly, Daily or as agreed by Participants.
Day-Count Conventions	As dictated by market standard for each Index (e.g., Act/360, Act/365, etc.).
Holiday Calendar	As agreed by Participants and suitable to the Currency's market standards.
Fixing Calendar	As agreed by Participants and suitable to the Currency's market standards.
Business Day Conventions	Modified Following with adjustment to period end dates or as agreed by Participants and suitable to each Currency's market standards.
Periodic Settlement Payment/Resets	
Floating Legs 1 & 2	The payment amount of the Floating Leg is based on: Notional, Payment Frequency, Day Count Convention, Floating Interest Rate Index, and Floating Reset Dates. Payments are settled in accordance with the payment frequency of the swap.
