Re: Class Certification of NHL Spread Swaps Pursuant to Section 5c(c) of the Commodity Exchange Act and CFTC Regulation 40.2(d)

Dear Sir or Madam:

Pursuant to Section 5c(c) of the Commodity Exchange Act (the “Act”), 7 U.S.C. § 7a-2(c), and Commission Regulation 40.2(d), 17 C.F.R. § 40.2(d), Ludlow Exchange, LLC (“Ludlow” or the “Exchange”), a registered designated contract market doing business as Novig, hereby certifies a class of NHL Spread swaps (the “Class”) for listing on the Exchange.

A description of the Class and the certifications required by Regulation 40.2(d) follow:

The Previously Certified Contract. On September 22, 2026, the Exchange submitted and certified the NHL Spread Contract pursuant to Commission Regulation 40.2(a), CFTC Submission No. 2609-2215-3351-38 (the “Previously Certified Contract”). The submission included the complete terms and conditions governing the Previously Certified Contract, including its pricing sources, formulas, procedures, and methodologies for determining reference values and payment obligations.

The Class. Each particular swap within the Class is an event contract based on a team’s margin of victory in a specified NHL hockey game or a designated portion of that game, measured against a goal line. Each swap will be governed by the terms and conditions of the Previously Certified Contract. The values assigned to <game>, <team>, <opponent>, <date>, <time period>, <comparison operator>, and <count> may vary among swaps within the Class and will be specified by the Exchange before the applicable swap is listed. No other term affecting the pricing source, calculation of the reference value, payment obligations, settlement procedure, or settlement currency may vary among swaps within the Class.

Identical Pricing Sources and Methodology. Each swap within the Class will use the NHL, the Governing Body of <game>, as the Source Agency and the identical source hierarchy specified in the Previously Certified Contract, applied in order: (i) the official results publication of the NHL; (ii) any other official channel maintained or expressly authorized by the NHL, such as ESPN, the Associated Press, TNT Sports, or the official broadcaster of <game>; (iii) the official records of any renamed, reorganized, or successor Governing Body of <game>; and (iv) a result reported concordantly by at least two independent sources with a credible reputation regarding events relative to the NHL. The reference value for each swap is <team>’s margin of victory in <time period> of <game>, calculated as <team>’s goals minus <opponent>’s goals recorded by the Source Agency within <time period>, with Overtime

included or excluded as provided in the definition of <time period>. A win for <team> is a positive number, a loss is a negative number, and a tie is zero. Where <game> is decided by a shootout, the shootout is deemed to add one goal to the total of the team winning the shootout and no goals to the opposing team, irrespective of the number of shootout attempts converted, and that deemed goal is included in the goal differential, so a win by shootout is a one-goal margin of victory. Settlement follows the Payout Criterion: if <team>'s margin of victory in <time period> of <game> is <comparison operator> <count>, the Member holding the YES side receives the Settlement Value, and if it is not, the Member holding the NO side receives the Settlement Value. "Above" means strictly greater than and "below" means strictly less than. Because <count> is always expressed as a half-integer number of goals, the margin can never equal <count>, and every swap resolves YES or NO; no swap within the Class can settle as a tie or a split. Where the applicable <time period> ends with equal goals scored by both sides, the differential is recorded as zero and the swap settles on that value under the Tie Rule. Each swap settles on an unequivocally determined Expiration Value under the Expiration Value Determination Rule. Shortened Play does not, in itself, void a swap, and where play ends by Shortened Play the applicable <time period> reaches its Conclusion. Under the Forfeit Rule, a forfeit before Commencement settles the swap to Void, and a forfeit after Commencement is treated as <game> having reached its Conclusion at the time of forfeiture, except that a score recorded to reflect the forfeit itself rather than goals scored in play is not used to determine the Expiration Value. A swap settles to Void only where the Previously Certified Contract expressly so provides; Void is a settlement outcome rather than a cancellation, and the swap remains binding and is resolved under the Fair Value Settlement Rule. Where a swap settles to Void—including under the Expiration Value Determination Rule, the Scheduling and Postponement Rule, the Series Conclusion Rule, the Format Change Rule, the Forfeit Rule, the No Result and Data Availability Rule, the Extraordinary Circumstances Rule, or the General Market Suspension Rule—or where any other provision otherwise provides for settlement at fair value, the swap will be resolved under the identical Fair Value Settlement Rule, including its Reference Time, Calculation Window, composite Fair Value Price sources, normalization methodology, Data Integrity exclusions, Fallbacks, and payment allocation. The determination of the Expiration Value is final under the Determination Finality Rule. Each swap will be denominated and settled in United States dollars.

Certifications. Pursuant to Section 5c of the Act and Commission Regulations 40.2(a)(3)(iv), 40.2(a)(3)(vi), and 40.2(d), the Exchange hereby certifies that:

- (i) each particular swap within the Class is based upon an excluded commodity specified in Commission Regulation 40.2(d)(1), specifically an occurrence, extent of an occurrence, or contingency within Section 1a(19)(iv) of the Act;
- (ii) each particular swap within the Class is based upon an excluded commodity with an identical pricing source, formula, procedure, and methodology for calculating reference prices and payment obligations;
- (iii) the pricing source, formula, procedure, and methodology for calculating reference prices and payment obligations in each particular swap within the Class are identical to those used in the Previously Certified Contract;

LUDLOW EXCHANGE, LLC.

New York, NY

(iv) each particular swap within the Class is based upon an excluded commodity involving an identical currency, the United States dollar;

(v) each particular swap within the Class complies with the Act and the Commission's regulations thereunder; and

(vi) concurrently with the filing of this submission, the Exchange has posted on its public website at <https://www.ludlowexchange.com/filings> a notice of pending class certification and a copy of this submission.

Submission Timing. The Exchange has filed this submission electronically through the CFTC Portal and will not list or facilitate trading in any swap within the Class unless the Commission has received this submission by the open of business on the business day preceding the listing, as required by Commission Regulation 40.2(a)(2).

Sincerely,

Calvin Smith
