The new Gold, Silver, and Copper weekly option contracts are referenced contracts that exercise into the core referenced Gold Futures (Commodity Code: GC; Rulebook Chapter: 113), Silver Futures (Commodity Code: SI; Rulebook Chapter 116, and Copper Futures (Commodity Code: HG, Rulebook Chapter 111), respectively. These new weekly option contracts expire prior to the spot month limits taking effect for the corresponding core referenced futures contract.

The Exchange reviewed the designated contracts market core principles (“Core Principles”) as set forth in the Commodity Exchange Act (“CEA” or “Act”) and identified that the Contracts may have some bearing on the following Core Principles:

- **Compliance with Rules:** Trading in the Contracts will be subject to the rules in COMEX Rulebook Chapter 4 which includes prohibitions against fraudulent, noncompetitive, unfair and abusive practices. Additionally, trading in these contracts will also be subject to the full panoply of trade practice rules, the majority of which are contained in Chapter 5 of the Rulebook. As with all products listed for trading on one of CME Group’s designated contract markets, activity in these new products will be subject to extensive monitoring and surveillance by CME Group’s Market Regulation Department. The Market Regulation Department has the authority to exercise its investigatory and enforcement power where potential rule violations are identified.
- **Contracts Not Readily Subject to Manipulation:** The Contracts are not readily susceptible to manipulation and are based on the deep liquidity of the underlying futures contracts.
- **Prevention of Market Disruption:** Trading in the Contracts will be subject to the COMEX Rulebook which include prohibitions on manipulation, price distortion and disruptions of the delivery or cash-settlement process. As with all products listed for trading on one of CME Group’s designated contract markets, activity in the new products will be subject to extensive monitoring and surveillance by CME Group’s Market Regulation Department.

- **Position Limitations or Accountability:** The speculative position limits for the Contracts as demonstrated in this submission are consistent with the Commission's guidance.
- **Availability of General Information:** The Exchange will publish on its website information regarding contract specifications, terms and conditions, as well as daily trading volume, open interest and price information for the Contracts.
- **Daily Publication of Trading Information:** The Exchange will publish information contract trading volumes, open interest levels, and price information daily on its website and through quote vendors for the Contracts.
- **Execution of Transactions:** The Contracts will be listed for trading on the CME Globex electronic trading and for clearing through CME ClearPort. The CME Globex trading venue provides for competitive and open execution of transactions. CME Globex affords the benefits of reliability and global connectivity.
- **Trade Information:** All required trade information for the Contracts will be included in the audit trail and is sufficient for the Market Regulation Department to monitor for market abuse.
- **Financial Integrity of Contract:** The Contracts will be cleared by the CME Clearing House which is a registered derivatives clearing organization with the Commission and is subject to all Commission regulations related thereto.
- **Protection of Market Participants:** COMEX Rulebook Chapters 4 and 5 contain multiple prohibitions precluding intermediaries from disadvantaging their customers. These rules apply to trading on all of the Exchange's competitive trading venues and will be applicable to transactions in these Contracts.
- **Disciplinary Procedures:** Chapter 4 of the Rulebook contains provisions that allow the Exchange to discipline, suspend or expel members or market participants that violate the rules. Trading in these Contracts will be subject to Chapter 4, and the Market Regulation Department has the authority to exercise its enforcement power in the event rule violations in these Contracts are identified.
- **Dispute Resolution:** Disputes with respect to trading in the Contracts will be subject to the arbitration provisions set forth in Chapter 6 of the Rulebook. The rules in Chapter 6 allow all non-members to submit a claim for financial losses resulting from transactions on the Exchange to arbitration. A member named as a respondent in a claim submitted by a non-member is required to participate in the arbitration pursuant to the rules in Chapter 6. Additionally, the Exchange requires that members resolve all disputes concerning transactions on the Exchange via arbitration.

Pursuant to Section 5c(c) of the Act and CFTC Regulation 40.2(a), the Exchange hereby certifies that the Contracts comply with the Act, including regulations under the Act. There were no substantive opposing views to the proposal.

The Exchange certifies that this submission has been concurrently posted on the CME Group website at <http://www.cmegroup.com/market-regulation/rule-filings.html>.

Should you have any questions concerning the above, please contact the undersigned at (312) 466-7478 or via e-mail at CMEGSubmissionInquiry@cmegroup.com.

Sincerely,

/s/ Timothy Elliott
Managing Director and Chief Regulatory Counsel

Deliverable Supply Analysis

Appendix C to part 38 of the Commission's regulations defines deliverable supply as "the quantity of the commodity meeting the contract's delivery specifications that can reasonably be expected to be readily available to short traders and saleable by long traders at its market value in normal cash marketing channels at the derivative contract's delivery points during the specified delivery period, barring abnormal movement in interstate commerce."

Stock Reporting Requirements

Pursuant to the rules of the Exchange, each depository is required to report to the Exchange the level of Exchange grade inventory on a daily basis. The inventory shall include eligible and registered metal. Eligible metal shall mean all such metal that is acceptable for delivery against the respective Exchange futures contract (i.e., which meets the specifications and approved brands of the respective futures contract) for which a warrant has not been issued. Registered metal shall mean eligible metal for which a warrant has been issued. Specifically, on a daily basis, each depository is required to provide the Exchange (1) the total quantity of registered metal stored at the depository, (2) the total quantity of eligible metal stored at the depository, and (3) the quantity of eligible metal and registered metal received and withdrawn from the depository.

The inventory levels at all Exchange-approved depositories for gold are made publicly available daily on the Exchange website.¹ Further, the rules of the Exchange require an independent inventory audit to be performed annually to provide a comprehensive reconciliation of stocks stored at depositories with records maintained by both the Exchange and the depository.²

Deliverable Supply Analysis

Gold

The Exchange determined at this time to base its estimates of deliverable supply of gold on registered stock as well as such gold stock meeting all specifications of the Gold futures contract stored at Exchange approved depositories. The Exchange recognizes that gold is used as an investment vehicle and as such some gold stock may be held as a long-term investment. While surveys conducted indicated no clear consensus as to how much gold is dedicated to long term investments, the Exchange, in an effort to represent a conservative deliverable supply that may be readily available for delivery, made a determination to discount from its estimate of deliverable supply 50% of its reported eligible gold at this time.

As of October 31, 2023, the gold inventory held at Exchange approved depositories totaled 19,916,440.753 troy ounces, the equivalent of 199,164 Gold futures contracts (contract size = 100 troy ounces). Exchange practice is to set spot month position limits at a maximum level of 25% of deliverable supply over the most recent three-year period. Deliverable supply is calculated as the sum of total reported registered gold with total reported eligible gold, after taking a 50% discount for eligible gold. Table 1 below shows the monthly average gold stocks in Exchange approved depositories for the most recent three-year period in contract equivalents.

¹ <http://www.cmegroup.com/market-data/reports/registrar-reports.html>

² <https://www.cmegroup.com/rulebook/NYMEX/1/7.pdf>

Inventory in Exchange Approved Depositories for Gold

Table 1 below provides the monthly inventory average of registered and eligible gold stored at Exchange approved depositories for the period beginning November 2020 through October 2023.

Over the November 2020 through October 2023 period, the monthly average registered gold was 154,030 futures equivalent contracts. The monthly average eligible gold was 73,894 futures equivalent contracts accounting for a 50% discount. Based on the foregoing, the Exchange estimates monthly deliverable supply for the Gold Futures (GC) contract at approximately 227,924 futures equivalent contracts.

The current spot month position limit of 6,000 contracts represents 2.6% of the estimated monthly deliverable supply. Therefore, the proposed spot month position limit for the Gold Weekly Tuesday Option and Gold Weekly Thursday Option is 6,000 contracts.

Silver

The Exchange determined at this time to base its estimates of deliverable supply of silver on registered stock as well as such silver stock meeting all specifications of the Silver Futures contract stored at Exchange approved depositories. The Exchange recognizes that silver is used as an investment vehicle and as such some silver stock may be held as a long-term investment. While surveys conducted indicated no clear consensus as to how much silver is dedicated to long term investments, the Exchange, in an effort to represent a conservative deliverable supply that may be readily available for delivery, made a determination to discount from its estimate of deliverable supply 50% of its reported eligible silver at this time.

As of October 31, 2023, the silver inventory held at Exchange approved depositories totaled 267,869,811.584 troy ounces, the equivalent of 53,574 Silver futures contracts (contract size = 5,000 troy ounces). Exchange practice is to set spot month position limits at a maximum level of 25% of deliverable supply over the most recent three-year period. Deliverable supply is calculated as the sum of total reported registered silver with total reported eligible silver, after taking a 50% discount for eligible silver. Table 1 below shows the monthly average silver stocks in Exchange approved depositories for the most recent three-year period in contract equivalents.

Inventory in Exchange Approved Depositories for Silver

Table 2 below provides the monthly inventory average of registered and eligible silver stored at Exchange approved depositories for the period beginning November 2020 through October 2023.

Over the November 2020 through October 2023 period, the monthly average registered silver was 15,402 futures equivalent contracts. The monthly average eligible silver was 25,368 futures equivalent contracts accounting for a 50% discount. Based on the foregoing, the Exchange estimates monthly deliverable supply for the Silver Futures (SI) contract at approximately 40,770 futures equivalent contracts.

The current spot month position limit of 3,000 contracts represents 7.4% of the estimated monthly deliverable supply. Therefore, the proposed spot month position limit for the Silver Weekly Tuesday Option and Silver Weekly Thursday Option is 3,000 contracts.

Copper

The Exchange determined at this time to base its estimates of deliverable supply of copper on registered stock as well as such copper stock meeting all specifications of the Copper Futures contract stored at Exchange approved warehouses.

As of October 31, 2023, the copper inventory held at Exchange approved warehouse totaled 21,322 short tons, the equivalent of 1,706 Copper futures contracts (contract size = 25,000 pounds). Exchange practice is to set spot month position limits at a maximum level of 25% of deliverable supply over the most recent three-year period. Deliverable supply is calculated as the sum of total reported registered copper with total reported eligible copper. Table 3 below shows the monthly average copper stocks in Exchange approved warehouses for the most recent three-year period in contract equivalents.

Inventory in Exchange Approved Warehouses for Copper

Table 3 below provides the monthly inventory average of registered and eligible copper stored at Exchange approved warehouses for the period beginning November 2020 through October 2023.

Over the November 2020 through October 2023 period, the monthly average registered copper was 3,691 futures equivalent contracts. The monthly average eligible copper was 565 futures equivalent contracts. Based on the foregoing, the Exchange estimates monthly deliverable supply for the Copper Futures (HG) contract at approximately 4,256 futures equivalent contracts.
