79	9/30/2022					No changes to the list of reference contracts since Workbook Version 1.7 published in June 2022. Changing naming format of Workbook to include workbook version instead of month/year of update.	Frequency of changes to the list of referenced contracts has slowed. Staff believes including the version number in the name of the workbook would better indicate the latest version of the workbook rather than the month/year naming convention originally adopted.
