This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

COMMODITY FUTURES TRADING COMMISSION

17 CFR Chapter I
RIN Number 3038–AE79
Post-Trade Name Give-Up on Swap Execution Facilities

AGENCY: Commodity Futures Trading Commission.

ACTION: Request for comment.

SUMMARY: The Commodity Futures Trading Commission (Commission or CFTC) is requesting public comment regarding the practice of “post-trade name give-up” on swap execution facilities.

DATES: Comments must be received on or before January 29, 2019.

ADDRESSES: You may submit comments, identified by “Post-Trade Name Give-Up on Swap Execution Facilities” and RIN number 3038–AE79, by any of the following methods:

• The agency’s website: http://comments.cftc.gov. Follow the instructions for submitting comments.

• Mail: Secretary of the Commission, Commodity Futures Trading Commission, Three Lafayette Center, 1155 21st Street NW, Washington, DC 20581.

• Hand Delivery/Courier: Same as Mail, above.

All comments must be submitted in English or, if not, accompanied by an English translation. Comments will be posted as received to http://www.cftc.gov. You should submit only information that you wish to make available publicly. If you wish the Commission to consider information that you believe is exempt from disclosure under the Freedom of Information Act,1 a petition for confidential treatment of the exempt information may be submitted according to the procedures established in Commission Regulation 145.9.2

The Commission reserves the right, but shall have no obligation, to review, pre-screen, filter, redact, refuse or remove any or all of your submission from http://www.cftc.gov that it may deem to be inappropriate for publication, such as obscene language. All submissions that have been redacted or removed that contain comments on the merits of this request for comment will be retained in the public comment file and will be considered as required under the Administrative Procedure Act and other applicable laws, and may be accessible under the Freedom of Information Act.

FOR FURTHER INFORMATION CONTACT: Aleko Stamoulis, Special Counsel, (202) 418–5714, astamoulis@cftc.gov; or Nhan Nguyen, Special Counsel, (202) 418–5932, nnguyen@cftc.gov, Division of Market Oversight, Commodity Futures Trading Commission, 1155 21st Street NW, Washington, DC 20581.

SUPPLEMENTARY INFORMATION:

I. Background

Historically, swaps traded in over-the-counter (“OTC”) markets rather than on regulated exchanges. Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank Act”)3 amended the Commodity Exchange Act (“CEA” or “Act”)4 to establish a new regulatory framework for swaps. This new framework included, among other reforms, the registration and regulation of swap execution facilities (“SEFs”)5 and the mandatory clearing of certain swaps by derivatives clearing organizations (“DCOs”).6 SEFs and DCOs have since become a significant part of swaps trading infrastructure and have helped to transition a large portion of swaps trading from unregulated, uncleared OTC markets to regulated trading venues and central clearing.

Many swaps are traded on SEFs through trading methods and protocols that are electronic, voice-based, or a hybrid of both; and that provide for anonymous trade execution, trade execution on a name-disclosed basis, or a combination thereof. This variety of trading methods and protocols has developed because of the broad and diverse range of products traded in the swaps market that trade mostly episodically rather than on a continuous basis. The decision by a market participant to use one execution method or another depends on considerations such as the type of swap, transaction size, complexity, the swap’s liquidity at a given time, the number of potential liquidity providers, and the associated desire to minimize potential information leakage and front-running risks.

“Post-trade name give-up” is a longstanding market practice in many swaps markets and originated as a necessary practice in OTC markets for uncleared swaps. Post-trade name give-up refers to the practice of disclosing the identity of each swap counterparty to the other after a trade has been matched anonymously. In the case of unclesared swaps, post-trade name give-up enables a market participant to perform a credit-check on its counterparty prior to finalizing a trade. Due to the bilateral counterparty relationship that exists in an uncleared swap agreement, post-trade name give-up is also necessary in order to keep track of credit exposure and payment obligations with respect to individual counterparties.

For trades that are cleared, however, the rationale for post-trade name give-up is less clear cut. That is because a DCO enables each party to substitute the credit of the DCO for the credit of the parties, thereby eliminating individual credit risk and counterparty exposure. Swaps that are intended to be cleared are subject to pre-execution credit checks and straight-through-processing requirements, effectively eliminating counterparty risk and, presumably, the need for market participants to know the identities of counterparties to anonymously matched trades.

Post-trade name give-up continues today in some swaps markets, including with respect to swaps that are anonymously executed and cleared.

---

2 7 U.S.C. 1 et seq.
3 See CEA section 5h, as enacted by section 733 of the Dodd-Frank Act; 7 U.S.C. 7b–5. See also Core Principles and Other Requirements for SEFs, 78 FR 33476 (June 4, 2013).
4 See Section 2(h)(1)(A) of the CEA, as enacted by section 723 of the Dodd-Frank Act; 7 U.S.C. 7b(h)(1)(A). In 2012, the Commission issued final rules to implement the clearing requirement determination under section 723 of the Dodd-Frank Act. The final rules required certain classes of credit default swaps and interest rate swaps to be cleared by DCOs registered with the Commission. Clearing Requirement Determination Under Section 2(h) of the CEA, 77 FR 74284 (Dec. 13, 2012).
5 5 U.S.C. 552.
6 17 CFR 145.9. Commission regulations referred to herein are found at 17 CFR chapter I.
Such disclosure may be made by a SEF as part of its trading protocols, or through middleware used for trade processing and routing trades to DCOs. For example, when a swap is matched using a voice-based execution method, a SEF employee may verbally disclose to a party the name of the other party to the trade. For swaps executed electronically on an anonymous order book, disclosure of counterparty names can occur through an electronic notification provided by the SEF after the trade is matched. Post-trade name give-up can occur through third-party middleware and associated trade processing and affirmation services that provide counterparties with various trade details captured from SEF trading systems, including the identity of the party on the other side of a trade.7

As the swaps market increasingly becomes a cleared market, the Commission believes that it is reasonable to ask whether the post-trade name give-up practice continues to serve a valid industry purpose in facilitating swaps trading. A variety of views exist on both sides of this issue, depending on one’s position in the market. Some industry participants have criticized the continued practice of post-trade name give-up in cleared swaps markets. During a meeting of the Commission’s Market Risk Advisory Committee held in April 2015, several participants in a panel on SEFs identified post-trade name give-up as a concern with respect to SEF trading.8 Post-trade name give-up is said to deter buy-side participation on some SEFs due to the prospect of information leakage, whereby disclosing the identity of a counterparty could potentially expose the participant’s trading intentions, strategies, positions, or other sensitive information to competitors or dealers.9 Some industry participants have also alleged that post-trade name give-up serves as a policing mechanism used by swaps dealers to retaliate against non-dealer firms that attempt to trade on interdealer markets.10 Such interdealer markets provide for competitive execution of large-sized trades at wholesale prices. Buy-side participants that have interest in trading on interdealer markets and otherwise meet participation criteria to join these platforms are said to be deterred because of post-trade name give-up.11 Based on these concerns, critics of post-trade name give-up have argued that the practice is anticompetitive, hinders liquidity, and lacks credible justification in cleared swaps markets where participants are not exposed to counterparty credit risk.12

Other industry participants have claimed that post-trade name give-up is an important tool used to mitigate liquidity risk or the risk that traders will game the market.13 Some participants argue that as bank market-making capital becomes further constrained by regulations,14 liquidity providers need to more precisely allocate their bank capital among their customer base in coordination with their overall bank cross-marketing strategies. Without the information provided by post-trade name give-up, the ability to make such allocations would become more difficult. As a result, liquidity providers would be less willing to provide liquidity to the market, especially in times of crisis, and charge higher prices to customers.15 This outcome arguably would hurt all market participants.

The Commission requests comment on the following questions:

Question 1: What utility or benefits (e.g., commercial, operational, legal, or other) does post-trade name give-up provide in SEF markets where trades are anonymously executed and intended to be cleared?

Question 2: Does post-trade name give-up result in any restraint of trade, or impose any anticompetitive burden on swaps trading or clearing?

Question 3: Should the Commission intervene to prohibit or otherwise set limitations with respect to post-trade name give-up? If so, what regulatory limitations should be set and how should they be set in a manner that is consistent with the CEA? What would be the potential costs and/or benefits of doing so? What might be the potential impacts on liquidity, pricing, and trading behavior? Would a prohibition cause dealers to remove liquidity from the market or charge higher prices?

Would new liquidity makers fully and consistently act in the market to make up any shortfall in liquidity?
Question 4: Should post-trade name give-up be subject to customer choice or SEF choice given the flexible execution methods in the Commission’s recent SEF notice of proposed rulemaking?

Issued in Washington, DC, on November 6, 2018, by the Commission.

Christopher Kirkpatrick,
Secretary of the Commission.

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 36

Loan Guaranty: Revisions to VA-Guaranteed or Insured Cash-Out Home Loans

AGENCY: Department of Veterans Affairs.

ACTION: Advanced notice of rulemaking.

SUMMARY: The Department of Veterans Affairs (VA) is issuing this document in compliance with the Economic Growth, Regulatory Relief, and Consumer Protection Act (the Act). The Act requires VA to amend its regulation on VA-guaranteed or insured cash-out refinance loans and to publish the amended regulation within a shortened time frame. If VA determines that urgent or compelling circumstances make compliance with the advance public notice and comment requirements of the Administrative Procedure Act impracticable or contrary to public interest and publishes notice of that determination in the Federal Register, the Act permits VA to amend the regulation through an interim final rule or final rule. VA has determined that urgent or compelling circumstances exist and is, therefore, issuing this Federal Register document announcing VA’s intent to promulgate an interim final rule implementing the Act.

DATES: November 30, 2018.

ADDRESSES: Loan Policy & Valuation, Loan Guaranty Service (26), Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420.

FOR FURTHER INFORMATION CONTACT: Greg Nelms, Assistant Director for Loan Policy & Valuation, Loan Guaranty Service (26), Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420.
