

The Commodity Futures Trading Commission (CFTC) requires contractor support to perform an independent analysis of CFTC's opportunities to leverage Artificial Intelligence in order to enhance monitoring, and regulatory functions which currently use legacy technologies. The contractor shall analyze the mission functionality with respect to data collected from markets and other sources, and in consideration of current organizational structures and user needs make recommendations to optimize the incorporation of AI and other advanced technologies in order to gain efficiencies. The work must be concluded in 30 days after receipt of order. This requirement is 100% set-aside for small business. Please submit requests for Solicitation 9523ZY22Q0072 to Kathryn (Kay) Rison at [krison@cftc.gov](mailto:krison@cftc.gov)
