

Posting on CFTC.gov – SirsiDynix Renewal

The Commodity Futures Trading Commission ("CFTC" or "Commission) intends to award a contract to SirsiDynix Corporation (SirsiDynix) for a subscription renewal of EOS.web and associated cloud hosting for a period of performance of one (1) year. The Government intends to procure this requirement under USC 41 §3304 (a)(1) and FAR 13.106-1(b)(1)(i) which states "the circumstances of the contract action deem only one source reasonably available." CFTC currently uses EOS.web as a platform for the check-in and check-out operations of the library. In carrying out the agency's mission, CFTC requires access to publications, materials, data and information that is housed in the CFTC's library. SirsiDynix is the current provider of the Library's catalogue software. EOS.web provides a compatible comprehensive tool to manage and track the library materials. Additionally, this system is integrated with the CFTC's network and FedRamp certified. There is no known alternative source that provides the tracking and management of the catalogue as required by CFTC which is available through the identified product. A subscription to EOS.web will provide the necessary information, data and analytics to support CFTC's library. The identified vendor is the sole provider of these items. Therefore, this vendor is the only responsible source identified as reasonably available that will satisfy the agency requirements.

This notice does not constitute a solicitation for offers and, as such, no solicitation is available. However, the Government will consider written responses from all responsible sources received by 5:00pm local (Washington, DC) on May 30, 2023. Written responses must include sufficient information to establish capability to fulfill the requirement. Any responses received will only be considered for the purpose of determining whether to conduct a competitive procurement in lieu of the sole source contract described in this notice, and such determination shall be made at the sole discretion of CFTC.
