

b. Select the “Edit” button; and
 c. Change or add the email address to receive email notifications for Office communications entered in the applications associated with the Customer Number. The participant may designate up to three email addresses. The Patent Center system will send a test email to each of the new email addresses associated with the Customer Number.

10. Who should a participant contact if an email notification for an Office communication has not been received?

The participant should contact the Patent EBC if an Office communication is available in Patent Center but the participant did not receive an email notification for the Office communication. The USPTO will take appropriate corrective actions. For example, the USPTO will send the participant an email notification if an email notification was not previously sent to the designated email addresses. Any time period for reply (except for the 63-day time period under 37 CFR 90.3) set forth in the Office communication will be restarted when the USPTO sends the email notification. For more information on the time period for reply, see item 4 above.

However, if the USPTO did send an email notification to each of the email addresses designated by the user, the USPTO will not send a new email notification, and any time period for reply set forth in the Office communication will not be restarted. The time period for reply will continue to run from the original mailroom/ notification date. Therefore, it is important for the user to designate the correct email addresses when signing up for the program.

11. Who should a participant contact if an improper communication has been scanned into the application?

The participant should contact the Patent EBC if an improper communication has been scanned into the application file, so that the USPTO can take appropriate corrective actions. For example, if the improper communication belongs to another application, the USPTO will move the communication to the correct application. The USPTO will send a new email notification when a proper communication is available and retrievable through Patent Center.

Please note that the document code corresponding to an Office communication identified on the email notification is informal (unofficial) information. If there is any discrepancy between the document code

corresponding to an Office communication identified on the email notification and the document code corresponding to the image of the communication available through Patent Center, the document code corresponding to the image of the Office communication available through Patent Center is the official record. The USPTO will not send a new email notification for an incorrect document code on the email notification.

If an Office communication contains an error that affects an applicant’s ability to reply to the Office communication and this error is called to the attention of the USPTO in writing within one month of the email date, the USPTO will follow the procedure set forth in section 710.06 of the Manual of Patent Examining Procedure (MPEP) (9th ed., rev. 7.2022, February 2023).

12. Who should the participant contact if the date of the email notification is a few days later than the mailroom/ notification date?

If the Office communication (e.g., an application filing receipt or a notice of publication) does not require a reply from an applicant and it does not have a time period for reply, it is not necessary for the participant to contact the Office. However, if the Office communication requires a reply and it sets forth a time period for reply, the participant should call the Patent EBC within one month from the email date so the USPTO can reset the time period for reply (except for the 63-day period under 37 CFR 90.3) to the original email date. For more information on the time period for reply, see item 4 above.

For example, an email notification sent on October 6, 2022, could indicate that an Office action with a mailroom/ notification date of October 3, 2022, has been entered in the application. The time period for reply set forth in the Office action commences on the mailroom/notification date (October 3, 2022). If the participant contacts the Patent EBC within one month from the email date (October 6, 2022), the USPTO will reset the time period for reply to commence on October 6, 2022.

13. How can a participant identify the email notification sent from the Office?

The email notification will have the following language in the subject line: “USPTO: Patent Electronic System—Correspondence Notification for Customer Number xxx.,” where “xxx” will be the participant’s Customer Number. The sender’s address will be “noreply@uspto.gov.” Any inquiries regarding the email notification should be directed to the Patent EBC.

Participants should not reply to the “noreply” email address.

14. Does the Patent Center e-Office Action program change the policy for communications via the internet?

By registering for the Patent Center e-Office Action program, a participant is authorizing the USPTO to send email notifications of Office communications entered by the participating USPTO business units in the applications associated with the Customer Number. The Patent Center e-Office Action program does not, otherwise, change the policy for communications via the internet as set forth in section 502.03 of the MPEP.

The Patent Center e-Office Action program does not alter the USPTO’s policy prohibiting an applicant or examiner from engaging in improper email correspondence. For example, the applicant may not send a reply to an Office action to the USPTO via email, and the examiner may not send an Office action to the applicant via email. See section 502.03 of the MPEP.

Katherine K. Vidal,

Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.
