COMMENT

What can be done to pay farmers a fair price so they can make a profit. As it is the buyers are getting rich and the farmers are going broke. We need to find a way for the farmers to set their own prices & have their own markets & bypass the buyer - COBOT is a shame & it cheats the farmers out of their profits & gives it to the rich fat cat buyer. We need to starve them out & make the farmer push for a change. The gov. should take all the controls off & let the farmers conduct their own business without interference. Let them set the prices & conduct their own business. They can do it. They are small enterprising businesses & can make money given a chance to do it their way. If Helligus Clinton can invest a small amount on commodities & reap great profits, so can farmers. It is time we help them instead of put them out of business. What you gonna do when there aren't any? You don't have food.

COMMENT

To whom it may concern
I understand you to pay farmers a fair price so they can
make a profit. But to the buyers and getting rich and
the farmers are going broke. We need to find a way for the
farmers to set their own price & have their own markets
& bypass the buyers. COBOT is a shame & it skews the
farmers out of their profits & gives it to the wealthy cut
buyers. We need to save them out & make the farmers
rich for a change. No one should take all the costs of
the farmer, let them set the price & conduct their own
business. They can do it. They can. Small enterprises. Business
the farmer make money given a chance to do it their way.
Hollings' children can invest a small amount of money
and make a great profit. So can the farmer. It is time
we help them instead of put them out of business. What you
gotta do is cut the buyers, farmers, & have food.
