addition to the requirements of this section, use of the 30-minute power must be limited to no more than 30 minutes per use, and no more than one hour per flight. The use of the 30-minute power must also be limited by:  
   (1) The maximum rotational speed, which may not be greater than—  
      (i) The maximum value determined by the rotor design; or  
      (ii) The maximum value demonstrated during the type tests;  
   (2) The maximum allowable gas temperature; and  
   (3) The maximum allowable torque.

Kimberly K. Smith,  
Manager, Rotorcraft Directorate, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION
Federal Aviation Administration

14 CFR Part 71

Establishment of Class E Airspace;  
Fort Morgan, CO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes Class E airspace at Fort Morgan, CO, to accommodate aircraft using a new Area Navigation (RNAV) Global Positioning System (GPS) standard instrument approach procedures at Fort Morgan Municipal Airport. This improves the safety and management of Instrument Flight Rules (IFR) operations at the airport.

DATES: Effective date, 0901 UTC, November 15, 2012. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

FOR FURTHER INFORMATION CONTACT: Richard Roberts, Federal Aviation Administration, Operations Support Group, Western Service Center, 1601 Lind Avenue SW., Renton, WA 98057; telephone (425) 203–4517.

SUPPLEMENTARY INFORMATION:

History  
On June 7, 2012, the FAA published in the Federal Register a notice of proposed rulemaking (NPRM) to establish controlled airspace at Fort Morgan, CO (77 FR 33687). Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9, dated August 9, 2011, and revised effective September 15, 2011, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in that Order.

The Rule  
This action amends Title 14 Code of Federal Regulations (14 CFR) Part 71 by establishing Class E airspace extending upward from 700 feet above the surface, at Fort Morgan Municipal Airport, to accommodate IFR aircraft executing new RNAV (GPS) standard instrument approach procedures at the airport. This action is necessary for the safety and management of IFR operations.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle I, Section 106 discusses the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes controlled airspace at Fort Morgan Municipal Airport, Fort Morgan, CO.

Environmental Review  
The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1E, “Environmental Impacts: Policies and Procedures.” Paragraph 311a, This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

List of Subjects in 14 CFR Part 71  
Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment  
In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR part 71 continues to read as follows:

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9, Airspace Designations and Reporting Points, dated August 9, 2011, and effective September 15, 2011 is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

* * * * *

AMM CO E5 Fort Morgan, CO [New]  
Fort Morgan Municipal Airport, CO (Lat. 40°02′02″ N., Long.103°48′15″ W.)  
That airspace extending upward from 700 feet above the surface within 7.5 mile radius of the Fort Morgan Municipal Airport.  

Robert Henry,  
Acting Manager, Operations Support Group, Western Service Center.

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 43
RIN 3038–AD08

Real-Time Public Reporting of Swap Transaction Data; Correction

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule; correction.
SUMMARY: The Commodity Futures Trading Commission ("CFTC" or "Commission") published the Real-Time Public Reporting of Swap Transaction Data ("Real-Time Public Reporting") rule and an accompanying preamble in the Federal Register on Monday, January 9, 2012 (77 FR 1182). This document makes an editorial correction to language of the preamble that conflicted with the rule text of the final rule.

DATES: Effective Date: These corrections are effective August 13, 2012.

FURTHER INFORMATION CONTACT: Laurie Gussow, Attorney-Advisor, 202–418–7623, lgussow@cftc.gov, Division of Market Oversight, Commodity Futures Trading Commission, Three Lafayette Center, 1155 21st Street NW., Washington, DC 20581.

SUPPLEMENTARY INFORMATION:

I. Background

The Commission published the final rule entitled Real-Time Public Reporting of Swap Transaction Data ("Final Rule") in the Federal Register on January 9, 2012 (77 FR 1182), adopting rules to implement a framework for the real-time public reporting of swap transactions and pricing data for all swap transactions. The final rule, which became effective on March 9, 2012, contains a sentence in a footnote that created an inconsistency as to the type of swap transactions that may be considered "publicly reportable swap transactions" under the Final Rule. The sentence is corrected in this release to eliminate the inconsistent language in the footnote and, thus, make clear that certain, and not all, covered transactions as described in Sections 23A and 23B of the Federal Reserve Act may be considered "publicly reportable swap transactions." As published, the last sentence of footnote 44 of the Final Rule reads: "The Commission considers any covered transaction between affiliates as described in Sections 23A and 23B of the Federal Reserve Act to be publicly reportable swap transactions." This sentence unintentionally conflicts with the text of § 43.2 defining "publicly reportable swap transaction," and with the preamble of the Final Rule. Section 43.2 defines the term "publicly reportable swap transaction," and also provides an example of certain swap transactions that do not fall within the definition. Under § 43.2, in paragraph (2)(i) of the definition of "publicly reportable swap transaction," certain inter-affiliate trades may not be reportable as the rule excludes from the definition of reportable swap transactions: "Internal swaps between one hundred percent owned subsidiaries of the same parent entity." Paragraph (3) of the definition states that the examples of transactions set forth in paragraph (2) of the definition that do not fall within the publicly reportable swap transaction definition "represent swaps that are not at arm's length and thus are not publicly reportable swap transactions, notwithstanding that they do result in a corresponding change in the market risk position between two parties." Indeed, there may be covered transactions as defined in Sections 23A and 23B of the Federal Reserve Act that are not at arm's length and thus are not publicly reportable swap transactions.

II. Summary of the Correction to the Real-Time Public Reporting Rule

The Commission received inquiries whether it considered all "covered transactions" between affiliates, as defined in Sections 23A and 23B of the Federal Reserve Act to be "publicly reportable swap transactions." As published, the last sentence of footnote 44 of the Final Rule reads: "The Commission considers any covered transaction between affiliates as described in Sections 23A and 23B of the Federal Reserve Act to be publicly reportable swap transactions." This sentence unintentionally conflicts with the text of § 43.2 defining "publicly reportable swap transaction," and with the preamble of the Final Rule. Section 43.2 defines the term "publicly reportable swap transaction," and also provides an example of certain swap transactions that do not fall within the definition. Under § 43.2, in paragraph (2)(i) of the definition of "publicly reportable swap transaction," certain inter-affiliate trades may not be reportable as the rule excludes from the definition of reportable swap transactions: "Internal swaps between one hundred percent owned subsidiaries of the same parent entity." Paragraph (3) of the definition states that the examples of transactions set forth in paragraph (2) of the definition that do not fall within the publicly reportable swap transaction definition "represent swaps that are not at arm's length and thus are not publicly reportable swap transactions, notwithstanding that they do result in a corresponding change in the market risk position between two parties." Indeed, there may be covered transactions as defined in Sections 23A and 23B of the Federal Reserve Act that are not at arm's length and thus are not publicly reportable swap transactions.

III. Correction

In FR Doc. 2011–33173 appearing on page 1182 in the Federal Register on Monday, January 9, 2012, the following correction is made:

On page 1187, revise the last sentence of footnote 44 to read, "Certain covered transactions between affiliates as described in Sections 23A and 23B of the Federal Reserve Act may be considered to be publicly reportable swap transactions."

Sauentina S. Warfield, Assistant Secretary of the Commission.
