SUPPLEMENTARY INFORMATION:

I. The Privacy Act

Under the Privacy Act of 1974, 5 U.S.C. 552a, a "system of records" is defined as any group of records under the control of a federal government agency from which information about individuals is retrieved by name or other personal identifier. The Privacy Act establishes the means by which government agencies must collect, maintain, and use personally identifiable information associated with an individual in a government system of records.

Each government agency is required to publish a notice in the **Federal Register** of a system of records in which the agency identifies and describes each system of records it maintains, the reasons why the agency uses the personally identifying information therein, the routine uses for which the agency will disclose such information outside the agency, and how individuals may exercise their rights under the Privacy Act to determine if the system contains information about them, among other things.

II. Routine Uses

Information in the systems of records covered by this **Federal Register** notice may be disclosed in accordance with the blanket routine uses numbered 1 through 19 published at 76 FR 5974 (Feb. 2, 2011). These blanket routine uses apply to all CFTC systems of records, except as otherwise provided in a specific system of records notice.

III. Enterprise Surveillance, Oversight & Risk Monitoring System

The Commission proposes to revise a system of records, CFTC-15 "Large Trader Report Files (Integrated Surveillance System)," and rename the system as "Enterprise Surveillance, Oversight & Risk Monitoring System." The notice revises the description of the system and enhancements to more broadly cover the Commission's market oversight, and market, risk and financial surveillance activities. The data covered by this expanded system includes records required to monitor the commodity futures and swaps markets, perform various mission-critical commodity futures and swaps market analyses, review activities of registered entities for compliance with the Commodity Exchange Act and Commission rules, and conduct surveillance on both intra and inter-exchange and across side-by-side electronic trading platforms.
