Subject: unlimited positions for index funds

very disappointing no group contributed more to inflated prices and non convergence SRW

I suspect that they were not mentioned because CME unwilling to lose fee income..

exempt because hedging risk ...who isnt ?

a sham...only enriches foreign banks and Pimco types

another excuse..hedge versus stock market

that was debunked in 2008/2009

they hurt pensions .endowments etc

call me if you care..or is it business as usual ...just fees
