OFFICE OF THE SECRETARIAL

September 28, 2007

Mr. David Stawick
Secretary
Commodity Futures Trading Commission
Three Lafayette Center
1155 21st Street, N.W.
Washington, D.C. 20581

Reference File # 2832.01
Rule Certification

Dear Mr. Stawick:

Pursuant to Commission Regulation 40.6(a), the Chicago Board of Trade (CBOT[®]) hereby submits the following:

- **Amendments to CBOT Rulebook Appendix 4C per the attached text (additions bolded).**

These amendments will:

- Establish the reportable position level for "conventional" CBOT Denatured Fuel Ethanol Options; and
- Codify that position limits and reportable position levels do not apply to CBOT Cash-Settled Denatured Fuel Ethanol Options, which will be an OTC-traded, clearing only product.

The CBOT intends to implement these amendments as of trade date October 5, 2007, concurrently with the launch of trading in Denatured Fuel Ethanol Options and the commencement of clearing services for Cash-Settled Denatured Fuel Ethanol Options.

There were no opposing views concerning these amendments.

The CBOT certifies that these amendments comply with the Commodity Exchange Act and the rules thereunder.

Sincerely,

Paul J. Draths
Vice President and Secretary

APPENDIX 4C

POSITION LIMITS AND REPORTABLE POSITIONS

The following are definitions of titles used in the position limit chart contained in this Appendix -

Spot Month- Spot month futures-equivalent position limit net long or net short effective at the start of trading on the first business day prior to the first trading day of the spot month.

Single Month- Futures-equivalent position limit net long or net short in any one month other than the spot month.

All Months -Position limit net long or net short in all months and all strike prices combined. Note: Long futures contracts, long call options, and short put options are considered to be on the long side of the market while short futures contracts, long put options, and short call options are considered to be on the short side of the market. For each commodity, the futures-equivalents for both the options and futures contracts are aggregated to determine compliance with the net long or net short same side position limits.

Reportable Futures Level-Reportable futures position in any one month.

Reportable Options Level-Reportable options position in any one month in each option category. Note:Option categories are long call, long put, short call, and short put.

Net Equivalent Futures Position-Each option contract will be adjusted by the prior day's risk factor, or delta coefficient, for that option which has been calculated by the Exchange's Clearing Services Provider

For the purpose of this Appendix:

- (i) An option contract's futures-equivalency shall be based on the prior day's delta factor for the option series, as published by the Exchange's Clearing Services Provider. For example, 8 long put contracts, each with a delta factor of 0.5, would equal 4 futures-equivalent short contracts.
- (ii) Long futures contracts shall have a delta factor of +1, and short futures contracts shall have a delta factor of -1.
- (iii) Long call options and short put options shall have positive delta factors.
- (iv) Short call options and long put options shall have negative delta factors.
- (v) An eligible option/option or option/futures spread is defined as an intra-month or inter-month position in the same Chicago Board of Trade product in which the sum of the delta factors is zero.

(Note: All position limits and reportable positions are in number of contracts and are based on futures or Net Equivalent Futures Positions, as defined above.

CONTRACT	*SPOT MONTH	*SINGLE MONTH	*ALL MONTH	*REPORTABLE FUTURES LEVEL	*REPORTABLE OPTIONS LEVEL
Credit Default Swap Index	None	None	None	200

Ethanol Forward Month Swap	N/A	N/A	N/A	N/A	N/A
Cash-Settled Ethanol Options	N/A	N/A	N/A	N/A	N/A

#1 Additional futures contracts may be held outside of the spot month as part of futures/futures spreads within a crop year provided that the total of such positions, when combined with outright positions, do not exceed the all months combined limit. In addition, a person may own or control additional options in excess of the futures-equivalent limits provided that those option contracts in excess of the futures-equivalent limits are part of an eligible option/futures spread.

#2 No more than 1,000 futures-equivalent contracts net on the same side of the market are allowed in a single month in all strike prices combined. Additional options contracts may be held as part of option/options or option/futures spreads between months within the same crop year provided that the total of such positions, when combined with outright positions, does not exceed the all months combined limit. The futures-equivalents for both the options and futures contracts are aggregated to determine compliance with these net same side single month position limits.

#3 No more than 13,500 futures-equivalent contracts net on the same side of the market are allowed in a single month in all strike prices combined. Additional options contracts may be held as part of option/option or option/futures spreads between months within the same crop year provided that the total of such positions, when combined with outright positions, does not exceed the all months combined limit. The futures-equivalents for both the options and futures contracts are aggregated to determine compliance with these net same side single month position limits.

#4 No more than 6,500 futures-equivalent contracts net on the same side of the market are allowed in a single month in all strike prices combined. Additional options contracts may be held as part of option/option or option/futures spreads between months within the same crop year provided that the total of such positions, when combined with outright positions, does not exceed the all months combined limit. The futures-equivalents for both the options and futures contracts are aggregated to determine compliance with these net same side single month position limits.

#5 In the last five trading days of the expiring futures month, the speculative position limit for the July futures month will be 200 contracts and for the September futures month the limit will be 250 contracts.

#6 No more than 1,400 futures-equivalent contracts net on the same side of the market are allowed in a single month in all strike prices combined. Additional options contracts may be held as part of option/option or option/futures spreads between months within the same crop year provided that the total of such positions, when combined with outright positions, does not exceed the all months combined limit. The futures-equivalents for both the options and futures contracts are aggregated to determine compliance with these net same side single month position limits.

#7 No more than 5,000 futures-equivalent contracts net on the same side of the market are allowed in a single month in all strike prices combined. Additional options contracts may be held as part of option/option or option/futures spreads between months within the same crop year provided that the total of such positions, when combined with outright positions, does not exceed the all months combined limit. The futures-equivalents for both the options and futures contracts are aggregated to determine compliance with these net same side single month position limits.

#8 In the last five trading days of the expiring futures month in May, the speculative position limit will be 600 contracts if deliverable supplies are at or above 2,400 contracts, 500 contracts if deliverable supplies are between 2,000 and 2,399 contracts, 400 contracts if deliverable supplies are between 1,600 and 1,999 contracts, 300 contracts if deliverable supplies are between 1,200 and 1,599 contracts, and 220 contracts if deliverable supplies are below 1,200 contracts. Deliverable supplies will be determined from the CBOT's Stocks of Grain report on the Friday preceding the first notice day for the May contract month. For the purposes of this Appendix, one mini-sized Wheat contract shall be deemed to be equivalent to one-fifth of a corresponding Wheat contract.

#9 The aggregate position limit in DJIA Index (\$25 multiplier) futures, mini-sized Dow (\$5 multiplier) futures and options, and DJIA Index futures and options is 50,000 DJIA Index futures contracts, net long or net short in all contract months combined. For the purposes of this appendix:

- One DJIA Index futures contract shall be deemed to be equivalent to two mini-sized Dow (\$5 multiplier) contracts.
- One DJIA Index (\$25 multiplier) futures contract shall be deemed to be equivalent to five mini-sized Dow (\$5 multiplier) contracts.
- Two DJIA Index (\$25 multiplier) futures contracts shall be deemed to be equivalent to five DJIA Index futures contracts.

#10 The net long or net short positions in Corn, Soybeans, or Wheat contracts may not exceed their respective position limits. The net long or net short positions in mini-sized Corn, mini-sized Soybeans, or mini-sized Wheat contracts may not exceed their respective position limits. The aggregate net long or net short positions in Corn and mini-sized Corn, Soybeans and mini-sized Soybeans, or Wheat and mini-sized Wheat contracts may not exceed their respective position limits. For the purposes of this Appendix, one mini-sized Corn, one mini-sized Soybean, or one mini-sized Wheat contract shall be deemed to be equivalent to one-fifth of a corresponding Corn, Soybeans, or Wheat contract.

#11 The reporting level for the primary contract is separate from the reporting level for the mini-sized contract. Positions in any one month at or above the contract level indicated trigger reportable status. For a person in reportable status, all positions in any month of that contract must be reported. For the purposes of this Appendix, positions are on a contract basis.

#12 In the last five trading days of the expiring futures month, the speculative position limit for the November futures month will be 180 contracts and for the January futures month the speculative position limit will be 100 contracts.

#13 In the last ten trading days of the expiring futures month, the following position limits in the expiring contract will apply: U.S. Treasury Bonds – 25,000 contracts; U.S. Treasury Notes (6½ - 10 Year) – 60,000 contracts; U.S. Treasury Notes (5 Year) – 45,000 contracts; U.S. Treasury Notes (2 Year) – 25,000 contracts. No hedge exemptions will be permitted with respect to these limits.
