Mr. David Stawick Office of the Secretariat Commodity Futures Trading Commission Three Lafayette Centre 1155 21st Street, N.W. Washington, DC 20581

## RE: Change Listing Cycle for Wheat Options CBOT Submission #11-211

Dear Mr. Stawick:

The Chicago Board of Trade ("CBOT" or "Exchange") hereby notifies the Commission of its intention to change the listing cycle for CBOT Wheat options to always include the first three contract expirations. The current listing cycle always includes only the first two contract expirations. This change is being implemented to facilitate the calculation of volatility index for Wheat. Implementation is planned for trade date July 25, 2011.

The Exchange currently publishes the CBOE/CBOT. Corn Volatility Index and CBOE/CBOT Soybean Volatility Index on its website and disseminates the data through its Market Data Platform and data vendors. To provide market participants more complete coverage of volatility in CBOT's major grain products, CME Group plans to calculate and publish/disseminate the CBOE/CBOT Wheat Volatility Index.

To calculate the wheat volatility index (VIX), one pre-condition is the expansion of the listing cycle for wheat serial options. VIX methodology uses the bids and offers in the first two expirations of the options market. The current Wheat options listing cycle always lists the first two expiration months – either a standard option month and a serial option month or two serial option months. However, VIX methodology rolls from the first and second option expirations to the second and third option expirations one week before the first option expires. The current option listing cycle does not always provide the third option expiration to allow the VIX to be calculated during this roll period. Thus, the Exchange plans to modify the Wheat serial option listing cycle to assure three consecutive option expirations are always listed in reduced strike price intervals.

The Exchange certifies that this action complies with the Commodity Exchange Act and regulations thereunder. There were no substantive opposing views to this proposal.

The attached tables illustrate the current and the new listing cycle for Wheat options. The necessary rulebook changes are also attached.

If you require any additional information regarding this action, please contact Randy Shao at 312-648-3795 or via email at <u>Renyuan.Shao@cmegroup.com</u> or Fred Seamon at 312-634-1587 or via e-mail at <u>Fred.Seamon@CMEGroup.com</u>. Alternatively, you may contact me at 212-299-2207 or via e-mail at <u>Felix.Khalatnikov@cmegroup.com</u>. Please reference CBOT Submission No. 11-211 in any related correspondence.

Sincerely,

/s/ Felix Khalatnikov Director and Associate General Counsel 2011 JUL 11 PM 2:53

The recommended rule book changes are attached with additions **<u>bold and underlined</u>** and deletions [<del>bracketed with strikethrough</del>].

## 14A01.E. Exercise Prices

Trading shall be conducted for put and call options with striking prices in integral multiples of five (5) cents and ten (10) cents per bushel per Wheat futures contract as follows:

## 1.

a. At the commencement of trading for each option contract, the Exchange shall list a strike closest to the previous day's settlement price of the underlying Wheat futures contract (the at-the- money strike), and strikes in integral multiples of ten cents in a range of 50 percent above and below the at-the-money strike. If the previous day's settlement price is midway between two strikes, the at-the-money strike shall be the larger of the two.
b. Over time, new ten cent strikes will be added to ensure that all strikes within 50 percent of the previous day's settlement price in the underlying futures contract are listed.

## 2.

a. At the commencement of trading for weekly options, and for options that are traded in months in which Wheat futures are not traded, and for standard option months the business day they become the [second] <u>third</u> listed month, the Exchange shall list a strike closest to the previous day's settlement price of the underlying Wheat futures contract (the at-the-money strike), and strikes in integral multiples of five cents in a range of 25 percent above and below the at-the-money strike. If the previous day's settlement price is midway between two strikes, the at-the-money strike shall be the larger of the two. For example, five-cent strike price intervals for the September contract would be added on the first business day after the expiration of the [July] June options contract.

b. Over time, new five-cent strike prices will be added to ensure that all strikes within 25 percent of the previous day's settlement price in the underlying futures are listed.

3. All strikes will be listed prior to the opening of trading on the following business day. Upon demand and at the discretion of the Exchange, new out-of-current-range strike prices at regularly defined intervals may be added for trading on as soon as possible basis. The Exchange may modify the procedures for the introduction of strikes as it deems appropriate in order to respond to market conditions. As new 5 and 10 cent strikes are added, existing strikes outside the newly determined strike ranges without open interest may be de-listed.
