July 15, 2009

Mr. David Stawick Office of the Secretariat Commodity Futures Trading Commission Three Lafayette Centre 1155 21st Street, N.W. Washington, DC 20581

# RE: CBOT Options on Interest Rate Swap Futures CME & CBOT Market Regulation Advisory Notice RA0908-3 CME/CBOT Submission No. 09-131R

Dear Mr. Stawick:

The Board of Trade of the City of Chicago, Inc. ("CBOT" or "Exchange") hereby notifies the Commodity Futures Trading Commission that trading in call options and put options on Interest Rate Swap futures will be eligible for trading on Globex<sup>®</sup> beginning Sunday, July 12, 2009, (for trade date July 13) and on the trading floor beginning Monday, July 13, 2009. CBOT self-certified the terms and conditions for these options via Submission #09-102 on May 29, 2009.

As set forth in Submission #09-102, these options are eligible to be block traded at a minimum threshold of 500 contracts. In connection with the launch of trading in these options, Chicago Mercantile Exchange Inc. ("CME" or "Exchange") and CBOT (collectively, "Exchanges") will issue revised Market Regulation Advisory Notice RA0908-3 ("Block Trades") which will incorporate the threshold level for these contracts.

The Exchanges certify that the Advisory Notice complies with the Act and regulations thereunder.

This submission reflects a correction in the first and second paragraphs to correctly reference previous Submission #09-102 which was inaccurately referenced as Submission #09-121 in the original submission on July 9, 2009.

If you have any questions regarding these contracts, please contact Frederick Sturm at 312.930.1282. If you have any questions concerning the Market Regulation Advisory Notice, please contact Robert Sniegowski, Associate Director, Market Regulation, at 312.341.5991. Please reference CME/CBOT Submission #09-131R in any related correspondence.

Sincerely,

/s/ Lisa A. Dunsky Director and Associate General Counsel

# MARKET REGULATION ADVISORY NOTICE

Exchange	CME & CBOT
Subject	Block Trades
Rule References	Rule 526
Advisory Date	July 13, 2009
Advisory Number	CME & CBOT RA0908-3

This Advisory Notice supersedes CME & CBOT Market Regulation Advisory Notice RA0903-3 issued on March 9, 2009, and reflects the addition of the minimum block trade threshold of 500 contracts in CBOT options on Interest Rate Swap futures based on today's commencement of trading in these contracts.

A complete list of CME and CBOT products in which block trading is permitted and the relevant quantity thresholds appear in Section 10 which begins on page 5. The text of CME and CBOT Rule 526 appears in Section 12 which begins on page 8.

## 1. Definition of Block Trades

Block trades are privately negotiated futures, options or combination transactions that meet certain quantity thresholds which are permitted to be executed apart from the public auction market. All block trades are subject to the conditions set forth in CME and CBOT Rule 526 ("Block Trades") and in this Advisory Notice.

## 2. Participation in Block Trades

Each party to a block trade must be an Eligible Contract Participant as that term is defined in Section 1a(12) of the Commodity Exchange Act. Eligible Contract Participants generally include exchange members and member firms, broker/dealers, government entities, pension funds, commodity pools, corporations, investment companies, insurance companies, depository institutions and high net-worth individuals. Commodity trading advisors and investment advisors who are registered or exempt from registration, and foreign persons performing a similar role and subject as such to foreign regulation, may participate in block transactions provided they have total assets under management exceeding \$25 million and the block trade is suitable for their customers.

A customer order may be executed by means of a block trade only if the customer has specified that the order be executed as a block trade.

Orders may not be bunched to meet the minimum block quantity thresholds.

## 3. Time and Prices of Block Trades

Block trades may be executed at any time, including times during which the public auction market is closed.

Block trades must be transacted at prices that are "fair and reasonable" in light of (i) the size of the transaction, (ii) the prices and sizes of other transactions in the same contract at the relevant time, (iii) the prices and sizes of transactions in other relevant markets, including, without limitation, the underlying cash market or related futures markets, at the relevant time, and (iv) the circumstances of the markets or the parties to the block trade.

CME & CBOT RA0908-3 July 13, 2009 Page 2 of 9

The trade price must be consistent with the minimum tick increment for the market in question. Additionally, each outright transaction and each leg of any block eligible spread or combination trade must be executed at a single price.

Block trade prices are reported independently of transaction prices in the regular market and are not included as part of the daily trading range. Block trade prices do not elect conditional orders (e.g. stop orders) or otherwise affect orders in the regular market.

## 4. Block Trade Minimum Quantities for Outrights, Spreads and Combinations

The block trade minimum quantity requirements for outright futures and options are set forth in the list of block trade eligible products in Section 10 beginning on page 5 of this Advisory Notice. Additional information with respect to spreads and combinations executed as blocks appears below.

## a) Intra-Commodity Futures Spreads and Futures Combinations

## i) All Products Excluding U.S. Treasury, Interest Rate Swap and GSCI Futures

Intra-commodity futures spreads and futures combinations may be executed as block trades provided that the *sum* of the quantities of the legs meets the minimum block quantity threshold. For example, a 2,000-contract Eurodollar futures calendar spread executed during RTH hours would meet the Eurodollar futures minimum quantity requirement of 4,000 contracts.

## ii) U.S. Treasury and Interest Rate Swap Futures

*Intra-commodity calendar spread block trades are prohibited in CBOT U.S. Treasury futures and Interest Rate Swap futures*. Parties may not execute contingent block trades in outright contracts to circumvent the prohibition on the execution of block trades in intra-commodity calendar spreads. Additionally, Tandem spreads may not be executed as block trades.

iii) GSCI Futures

In GSCI futures and GSCI Excess Return Index futures the block trade minimum is 300 contracts for each leg of the spread or combination. For example, the minimum quantity for a GSCI calendar spread would require 300 contracts in each leg of the spread for a total of 600 contracts while a GSCI futures butterfly would require a minimum volume of 1,200 contracts.

#### b) Inter-Commodity Futures Spreads

## i) All Products Excluding Short Term Interest Rate Futures

In all products excluding Short Term Interest Rate futures, inter-commodity futures spreads may be executed as block trades provided that the quantity of *each* leg of the spread meets the *larger* of the threshold requirements for the underlying products. For example, the minimum quantity thresholds for 10-Year Notes and 30-Year Treasury Bonds during RTH are 5,000 and 3,000 contracts, respectively. Therefore, a block trade in the NOB spread (10 Year Note/30 Year Bond spread) can be executed only if the quantity of each leg is at least 5,000 contracts.

## ii) Short Term Interest Rate Futures

In Short Term Interest Rate futures (Eurodollars, Eurodollar E-minis, T-Bills, OIS, One-Month Libor, Euroyen and 30-Day Fed Funds) inter-commodity futures spreads may be executed as block trades provided that the *sum* of the legs of the spread meets the *larger* of the threshold requirements for the underlying products. For example, the minimum quantity thresholds for Libor and Eurodollars during ETH are 200 and 2,000 contracts, respectively. Therefore, a block trade in the LED spread (Libor/Eurodollars) can be executed provided that the sum of the legs is 2,000 contracts.

CME & CBOT RA0908-3 July 13, 2009 Page 3 of 9

## c) Intra-Commodity Option Spreads and Combinations

Intra-commodity option spreads and combinations may be executed as block trades provided that the quantity of *each leg* of the spread meets the designated minimum quantity threshold.

#### d) Inter-Commodity Option Spreads and Combinations

Inter-commodity option spreads and combinations may be executed as block trades provided that the quantity of *each leg* of the spread meets the *larger* of the threshold requirements for the underlying products.

#### e) Options/Futures Spreads

In general, options/futures spreads may be executed as block trades provided that the options component of the spread meets the minimum quantity threshold for the outright option or option combination and the quantity of futures executed is consistent with the delta of the options component of the spread. An exception applies to Weather, Real Estate and Non-Farm Payroll options/futures spreads, where the legs of the spread may be summed to meet the 20-contract minimum threshold.

## 5. Block Trade Reporting Requirements

## a) Time Requirements

#### i) Interest Rate Block Trades

Block trades must be reported to the exchange by the seller within **five minutes** of the transaction for block trades executed during RTH and within **fifteen minutes** of the transaction for block trades executed during ETH and ATH.

#### ii) Other Block Trades Excluding Interest Rates, Weather and Housing Block Trades

Block trades must be reported to the exchange by the seller within five minutes of the transaction.

#### iii) Weather and Housing Block Trades

Block trades must be reported to the exchange by seller within fifteen minutes of the transaction.

#### b) Reporting Methods

Block trades must be reported to the exchange via one of the methods described below.

#### i) Globex Control Center ("GCC")

All block trades (except for block trades in Weather futures and options executed between 8:00 a.m. and 3:30 p.m. Chicago time, Monday – Friday on regular business days – see subsection iv on the next page) may be reported to the GCC. The seller reports the trade by calling the GCC at **312.456.2391**. When the GCC is closed – for example, during the weekend – the block trade must be reported no later than five minutes prior to the opening of the next electronic trading session for that product.

#### ii) CME ClearPort Clearing

Block trades may be electronically reported directly to CME Clearing via CME ClearPort Clearing. For information on reporting block trades through CME ClearPort Clearing, please contact customer service at 1.800.438.8616 or via email at ClearPort@cmegroup.com.

## iii) CME Clearing360 Trade Reporter

Block trades may be electronically reported directly to CME Clearing via CME Clearing360 Trade Reporter, available through the CME EOS Trader web-based front end. For additional information on reporting block trades via CME Clearing360 Trade Reporter, please visit <u>http://cmegroup.com/clearing/trading-practices/cme-clearing360-tradereporter.html</u> or contact CME Clearing Customer Support at 312.207.2525 or via email at CCS@cmegroup.com.

#### iv) Weather Blocks on CME Clearing360 via Pivot Instant Markets

Block trades in Weather futures and options may be electronically reported directly to CME Clearing360 via Pivot Instant Markets by eligible inter-dealer brokers. For additional information on reporting block trades via Pivot Instant Markets, please contact Angie DiCarlo, Associate Director, CME Group Alternative Investments at 312.930.4515 or via email at <u>Angie.DiCarlo@cmegroup.com</u>.

## v) Weather Block Trades Executed Between 8:00 a.m. and 3:30 p.m.

Block trades in Weather futures and options executed between 8:00 a.m. and 3:30 p.m. Chicago time, Monday – Friday on regular business days should be reported to exchange staff by calling 312.648.3935 or 312.648.3936.

When reporting a block trade, the following information will be required:

- Name and phone number of the clearing firm representative reporting the trade (unless the block trade is electronically reported);
- Buyer's clearing firm and seller's clearing firm;
- Contract, contract month and contract year for futures;
- Contract, contract month, contract year, strike price and put or call designation for standard options, as well as the expiration date and exercise style for flex options;
- Quantity of the trade or, for spreads and combinations, the quantity of each leg of the trade;
- · Price of the trade or, for spreads and combinations, the price of each leg of the trade; and
- Execution time (in Central Time) of the trade (i.e. the time at which the trade was consummated).

## 6. Block Trade Submission Requirements to CME Clearing

Block trades must be submitted for clearing through the front-end clearing UI via the portal under BLOCK entry. Block trades are entered by both the buyer's and seller's clearing firm and go through a two-sided match process. Upon entry, confirmation records will be routed back to the firms for bookkeeping purposes. When reporting spread or combination transactions, each leg must be entered individually.

The execution time is required to be entered and must be the actual time at which the transaction was consummated by the two parties, not the time at which the trade is reported by the parties to their respective firms. Thus, if the clearing member has not acted as either principal or agent in the transaction, it must ensure that its customer provides an accurate execution time.

A block trade in a block-eligible option may be executed up to and including the day on which an option contract expires for purposes of offsetting an open option position. The offsetting block trade must be reported to the GCC pursuant to the requirements of section 4 above, and the offset must be reported to CME Clearing no later than the Position Change Submission ("PCS") deadline on the day on which the option contract expires. The current PCS deadline is 7:30 p.m.

## 7. Block Trade Recordkeeping

Complete order records for block trades must be created and maintained, just as with any other transaction. However, as noted above, the time of execution of the block trade must also be recorded.

CME & CBOT RA0908-3 July 13, 2009 Page 5 of 9

## 8. Dissemination of Block Trade Information

The date, execution time, contract details, price and quantity of block trades are reported upon receipt of the block information by GCC. Block trade information is reported on the MerQuote system and may be accessed by entering the code "BLK". The information will also be displayed on cmegroup.com at the following link: <u>http://www.cmegroup.com/tools-information/blocktrades.html</u>. Block trade information is also displayed on the trading floor.

Block trade prices are published separately from transactions in the regular market.

Block trade volume is also included with other privately negotiated transactions in the daily volume reports published by the exchange.

## 9. Pre-Execution Communications

The prohibition on prearranged trading and the requirements related to pre-execution communications with respect to certain Globex trades set forth in Rule 539 do not apply to block trades.

## 10. CME & CBOT Block Trade-Eligible Products

For purposes of the interest rate products in the tables, the following times apply:

- ETH: 12:00 a.m. 7:00 a.m. CT, Monday through Friday on regular business days
- RTH: 7:00 a.m. 4:00 p.m. CT, Monday through Friday on regular business days
- ATH: 4:00 p.m. 12:00 a.m. CT, Monday through Friday on regular business days and at all times on weekends

## 12. Text of CME & CBOT Rule 526

#### Rule 526 BLOCK TRADES

The Exchange shall designate the products in which block trades shall be permitted and determine the minimum quantity thresholds for such transactions. The following shall govern block trades:

- A. A block trade must be for a quantity that is at or in excess of the applicable minimum threshold. Orders may not be aggregated in order to achieve the minimum transaction size, except by those entities described in Sections I. and J.
- B. Each party to a block trade must be an Eligible Contract Participant as that term is defined in Section 1a(12) of the Commodity Exchange Act.
- C. A member shall not execute any order by means of a block trade for a customer unless such customer has specified that the order be executed as a block trade.
- D. The price at which a block trade is executed must be fair and reasonable in light of (i) the size of the block trade, (ii) the prices and sizes of other transactions in the same contract at the relevant time, (iii) the prices and sizes of transactions in other relevant markets, including without limitation the underlying cash market or related futures markets, at the relevant time, and (iv) the circumstances of the markets or the parties to the block trade.
- E. Block trades shall not set off conditional orders (e.g., Stop Orders and MIT Orders) or otherwise affect orders in the regular market.

CME & CBOT RA0908-3 July 13, 2009 Page 9 of 9

- F. CME The seller must ensure that each block trade is reported to the Exchange within five minutes of the time of execution; except that block trades in interest rate futures and options executed outside of Regular Trading Hours (7:00 a.m. 4:00 p.m. Central Time, Monday Friday on regular business days) and Housing and Weather futures and options must be reported within fifteen minutes of the time of execution. The report must include the contract, contract month, price, quantity of the transaction, the respective clearing members, the time of execution, and, for options, strike price, put or call and expiration month. The Exchange shall promptly publish such information separately from the reports of transactions in the regular market.
- F. CBOT The seller must ensure that each block trade is reported to the Exchange within five minutes of the time of execution; except that block trades in interest rate futures and options executed outside of Regular Trading Hours (7:00 a.m. 4:00 p.m. Central Time, Monday Friday on regular business days) must be reported within fifteen minutes of the time of execution. The report must include the contract, contract month, price, quantity of the transaction, the respective clearing members, the time of execution, and, for options, strike price, put or call and expiration month. The Exchange shall promptly publish such information separately from the reports of transactions in the regular market.
- G. Clearing members must report block trades to the Clearing House in accordance with the Clearing House Manual of Operations.
- H. Clearing members and members involved in the execution of block trades must maintain a record of the transaction in accordance with Rule 536.
- I. A commodity trading advisor ("CTA") registered or exempt from registration under the Act, including, without limitation, any investment advisor registered or exempt from registration under the Investment Advisors Act of 1940, shall be the applicable entity for purposes of Sections A., B., C., and D., provided such advisors have total assets under management exceeding \$25 million and the block trade is suitable for the customers of such advisors.
- J. A foreign Person performing a similar role or function to a CTA or investment advisor as described in Section I, and subject as such to foreign regulation, shall be the applicable entity for purposes of Sections A., B., C., and D., provided such Persons have total assets under management exceeding \$25 million and the block trade is suitable for the customers of such Persons.
