

Exhibit A-1(8)

Anticipated volume of business emanating from members and other participants that will be provided direct access to the FBOT trading system.

For the first half of 2012, the volume for all Eurex products from members¹ in the US who have been provided direct access to the Eurex Trading Platform totalled 117 million single sides. This level of activity relative to total volume has been stable over the past few years. Accordingly, trading volume from US members is expected to vary with changes in total exchange volumes. Along with the information we provide to the Commission quarterly, Eurex is happy to update this exhibit during the period in which this FBOT application is pending.

¹ As noted elsewhere, only Eurex members are granted access to its trading platform.
