

**National statutes, laws and regulations governing the activities of the FBOT and its respective participants.**

The activities of Eurex and its participants are governed by the German Securities Trading Act, the German Banking Act, and the German Stock Exchange Act.

The German Stock Exchange Act sets the legal basis for the establishment and organization as well as trading at regulated exchanges, including Eurex. The German Securities Trading Act and/or the German Banking Act, as the case may be, sets forth further rules that are generally applicable to participants of Eurex, depending on the specific business activities pursued in Germany. (For a more detailed discussion of the laws governing Eurex, please see Exhibit F.) All of the exhibits for this section are convenience translations of German laws. Where there is a conflict between the English and German versions, the German version will be binding.
