RULE 539. Execution of Orders

(a) Transactions on the DCM Trading System: This Rule 539(a) applies to the DCM Trading System.

(i) Orders to buy or sell any Contract are subject to the minimum trading requirements specified in the relevant Contract rules. For each trade matched on the DCM Trading System, the DCM Trading System Platform shall promptly notify each Participant party to such trade that the trade has been executed (provided that a trade that is executed for a commodity pool needs to be confirmed only to the operator of such pool).

Except as expressly provided for by the Rules, all Orders are matched with each other and executed electronically through the order book of the DCM Trading System ~~the Platform~~ in accordance with an algorithm that gives first priority to Orders at the best price and priority among Orders entered at the same price based on the length of time such Order has been resting. Without limiting the generality of the foregoing, the algorithm to match Orders entered in the order book of the DCM Trading System ~~the Platform~~ is based upon the following principles:

(ii) An Order at a better price will always have priority over Orders at inferior prices, except as provided in Rule 539(a)(~~iv~~ii).

(iii) A Limit Order will be executed when entered to the extent that there are resting contra-Orders, with any balance of such Limit Order to remain as a resting Order until such Limit Order is executed or is cancelled. Limit Orders must be entered with a user-defined limit price. All Limit Orders shall be cancelled by the DCM Trading System at the conclusion of Trading Hours on each Business Day.

(iv) “Immediate or Cancel”, in reference to an Order, means that such Order is executed against all resting contra-Orders at the stated price or better, up to the volume

designated by the Order. Any residual volume of the Order is cancelled by the DCM Trading System.

(v) Except as provided in Rule 539(a)(~~iv~~ii), as among resting Orders at the same price, the algorithm will identify the resting Order to be matched against by length of time such Order has been resting. For the first two years following the date of the Exchange's designation as a Designated Contract Market, any decrease or increase to the size of a resting Order will not affect the priority of such Order.

~~(iii)~~(vi) An Iceberg Order will not be treated as a resting Order eligible to be matched, except to the extent of its displayable portion. Only the displayed portion of an Iceberg Order shall be visible. When a displayed portion is fully matched, any remaining reserve portion shall be re-divided into a displayed portion and reserve portion. The reserve portion of an Iceberg Order shall not be displayed nor will any indicator be contained in the market data stream to expose its presence.

~~(iv)~~(vii) TRADEON Sessions: A TRADEON Session will start for a Contract if an Order and a contra-Order are matched for that Contract (a "Matched Session"). Each Matched Session shall, if any Order for the relevant Contract remains unmatched at the end of such session, be followed by a new session (a "Continuing Session" and together with a Matched Session, a "TRADEON Session"). Each TRADEON Session lasts for typically ten seconds. Orders in the Contract subject to a TRADEON Session will only be matched at the "Market Equilibrium Price", which is the price at which a trade was executed in the Matched Session. In the event that a trade executed in the Matched Session is a sweep of the order book in which a trade is executed at multiple prices, the Market Equilibrium Price shall be the worst price from the perspective of the aggressor.

(A) Initial Session: At the start of a Matched Session, a TRADEON window appears on the platform screen, indicating that a TRADEON session has begun. The initial session is a limited time window (typically 10 seconds) during which any participant on the DCM Trading System may submit an order to buy or sell specified sizes of the product at the indicated Market Equilibrium Price. Orders placed during this time window are not visible to the market. Users can submit their Orders beginning immediately at the start of a TRADEON Session and for the duration of the session, and any Orders submitted for a TRADEON Session will be queued in priority order. During an initial TRADEON Session, priorities are as follows:

(B) In a Matched Session, any unfilled portion of the original Orders that initiated the trade is moved into the TRADEON Session, and the original parties may add to their Orders during the session and retain top priority.

(C) Users with resting Orders in the DCM Trading System order book at the Market Equilibrium Price will automatically be moved into the TRADEON Session and have the same priority in the initial session as they do in the order book.

(D) For all other users, any Orders entered during the initial session are lower priority than any of the Orders described in paragraphs (B) and (C) of this Rule 539(a)(~~iv~~iii). Such Orders are prioritized among themselves by the time of submission. For Iceberg Orders, the notional visibility (i.e., the displayed notional amount of an Iceberg Order) has priority over the reserve portion of an Iceberg Order.

(E) Orders in the initial TRADEON session are matched at the end of the session and based on the priority order set forth above. If both of the original parties to the trade (for trade-initiated TRADEON Session) enter an ~~e~~Order, the ~~e~~Orders will match immediately as they have the highest priority and are guaranteed to match.

~~(v)~~(viii) Continuing Session: If any Orders remain unmatched at the end of a TRADEON Session and a trade occurred during such TRADEON Session, a Continuing Session will begin. Additional Orders may be submitted at any time during the Continuing Session. During a Continuing Session, Orders are prioritized solely by notional visibility and time. All Orders are matched at the Market Equilibrium Price and are matched immediately if there is a contra ~~e~~Order in the Continuing Session. If, at the end of the Continuing Session, a trade has occurred, and there are unmatched TRADEON ~~e~~Orders remaining, another Continuing Session will begin.

~~(vi)~~(ix) Termination: At the conclusion of a TRADEON Session, if no Continuing Session will follow pursuant to Rule 539(a)(viii) above, the session shall terminate and any Orders that have not matched during such session shall be placed in the order book based on their price.

(b) Transactions on the SEF Trading System: This Rule 539(b) applies to the SEF Trading System.

(i) Request for Quote Functionality. The Request for Quote (“RFQ”) functionality of the SEF Trading System allows a Participant (the “Requesting Participant”) to send an RFQ to buy or sell a Contract to ~~certain~~ other Participants specifically selected by the Requesting Participant, or to all Participants that are eligible to receive an RFQ from Requesting Participant, to which all such Participants may respond. RFQ functionality will ~~be~~ operate in conjunction with an order book for Required Transactions.

Upon submission of an RFQ by a Requesting Participant, the SEF Trading System shall communicate to the Requesting Participant any bid or offer for the relevant Required Transaction which is resting on the order book of the DCM Trading System.

(B) The Exchange shall offer a customized order book on the SEF Trading System for Required Transactions that are not listed for trading on the order book of the DCM Trading System.

~~(B)(C) The Exchange shall communicate any bid or offer that is resting on the order book of the DCM Trading System to Requesting Participants at the same time that Requesting Participants receive the first responsive bid or offer, as applicable, in response to a RFQ on the SEF Trading System; provided, however that such RFQ is in respect of a Required Transaction that is offered for trading on the order book of the DCM Trading System. Requesting Participants may shall have the ability to execute against the bid or offer, as applicable, communicated to them from the order book of the DCM Trading System, the customized order book of the SEF Trading System, or any responsive quotes to the RFQ of Requesting Participants.~~

~~The Exchange shall offer a customized order book on the SEF Trading System for Required Transactions that are not listed for trading on the order book of the DCM Trading System.~~

(c) Execution on the Platform of a Required Transaction shall occur through one of the following methods:

(~~xii~~)(xi) Upfront Payment. An upfront payment will be exchanged between the payer and the receiver of an SCSMTM Swap. The direction and amount of the payment is dependent on the price at which the SCSMTM Swap was transacted on.

(A) Payment Direction.

(1) If Price < 100, the Fixed Rate Payer makes payment to the Fixed Rate Receiver.

(2) If Price > 100, the Fixed Rate Payer receives payment from the Fixed Rate Receiver.

(B) Payment Calculation. Upfront Payment is calculated using the following formula:

$$\text{Notional Amount} * (100 - \text{Price}) / 100$$

(C) Final Settlement Date and Price. Settlement of the upfront payment will occur on T+2 and is calculated as described in (B) above.
